SUBJECT INDEX

Abattoirs
  Small U.S. abattoirs, 1272
Açaí
  Chagas' disease and foods, 441
Acaricidal activity
  Acaricidal activity of *J. chinensis* leaf oil, 1686
  Stored food mites and geraniol congeners, 1468
Acetic acid
  Acid resistance of *E. coli* O157:H7, 503
  Listeria growth and growth boundary model, 2132
Acid
  Adaptive responses of *L. monocytogenes*, 1412
Acidic dressing
  Field validation of predictive models, 101
Acidified calcium sulfate
  Acidified compounds on cantaloupes, 2453
Acidified foods
  Acid resistance of *E. coli* O157:H7, 503
Acidified sodium chlorite
  Validation of interventions in tenderized and injected beef, 1616
Acid resistance
  Acid resistance of *E. coli* O157:H7, 503
  Adaptive responses of *L. monocytogenes*, 1412
Acid stress
  Effect of stress on *L. monocytogenes* resistance to UV light, 1634
Acute gastroenteritis outbreak
  FBD outbreaks: determination of etiologic agent, 1958
N-Acyl homoserine lactone
  Quorum sensing in *P. fragi*, 2597
Adaptation
  Effect of stress on *L. monocytogenes* resistance to UV light, 1634
Adenosine
  Identification of an interfering substrate in apple juice, 805
Adherence
  E. coli O157:H7 on salad leaves causes human infection, 1531
  Listeria strains isolated from three RTE meat plants, 2125
  Mannoproteins affect *C. jejuni* adherence and invasion of Caco-2 cells, 55
Adhesion
  Q. infectoria alters Shiga toxigenic *E. coli* cell surface properties, 1699
Adhesion kinetics
  Adherence of *Listeria monocytogenes*, 1885
Aerobic plate count(s)
  DBDMH-reduced pathogens on fresh meat, 151
  Preparing carcass sponge samples, 428
Aflatoxin
  A maize protein with antifungal activity, 120
  A new maize trypsin inhibitor, 185
  Biocontrol of aflatoxin in corn, 801
Aflatoxin B_1
  Autochthonous strains of lactic acid bacteria, 189
  Fungal flora and mycotoxins of Romanian cereals, 662
Aflatoxin M_1
  Aflatoxin M_1 in human breast and raw milk in Turkey, 885
  Aflatoxin M_1 in pasteurized milk, 1761
  Prevalence of AFM_1 in milk, 1025
Agricultural practices
  Fumonisins in maize and agricultural practices, 898
Agricultural product
  Monitoring fumonisin in agricultural products, 436
Alberta, Canada
  Microbiological survey of produce in Alberta, Canada, 415
Alfalfa
  Microbiological quality of seed sprouts, 856
Alicyclobacillus acidoterrestris
  Disinfectants and *A. acidoterrestris*, 510
Allergen
  Detection of allergen in walnut by PCR, 2433
Almonds
  Thermal inactivation of *Salmonella* on almonds, 1602
α-Eudesmol
  Acaricidal activity of *J. chinensis* leaf oil, 1686
Amazonian palm berry
  Chagas' disease and foods, 441
Amidation
  Bactericidal activity of lactoferrin and its derivatives in ground beef, 760
Amino acid sequence
  Purification of pentocin 31-1, 2524
Aminoglycosides
  Antibiotics in milk, 1338
Amperometric immune sensor
  Concentration and detection of *Salmonella*, 591
Amplified fragment length polymorphism (AFLP)
  Campylobacter in retail poultry in Northern Ireland, 1830
Animal enteric pathogens
  Nonculturable response of APE on plants, 1342
Animal feed
  PCR detection of highly processed whale meat, 1496
  Real-time PCR for detection of MBM in animal feeds, 1055
Animal meal
  A rapid real-time PCR method for the detection of animal material, 2368
Animal model
  C. sakazakii in neonatal mice, 2363
Animal welfare
  Food safety of products from organic livestock systems, 2629
Antagonistic bacteria
  Biocontrol of *Salmonella* on tomatoes, 2284
  Microbial antagonists of *E. coli* O157:H7 on lettuce and spinach, 1569
Antibacterial activity
  Antibacterial action of chitosan on *Campylobacter* spp., 1735
  Assessment of *E. americana* and its bioactive compounds, 354
Antibacterial effects
  Antibacterial effect of green tea and rosemary, 1107
Antibiosis
  Biocontrol of human pathogens on bell pepper, 85
Antibiotic resistance
  Antibiotic resistance markers in Egyptian cheese, 624
  Antibiotic resistance of lactobacilli from cheese, 2162
  Antibiotic resistance of *L. brevis* KB290, 1923
  Antibiotic resistance of STEC, 21
  Diversity and susceptibility of *Enterococcus*, 766
  E. coli O26 VTEC in buffalo milk, 1705
  Effect of stress on *L. monocytogenes* resistance to UV light, 1634
  Egg yolk antibodies and *Salmonella* shedding in pigs, 267
  Genotype and phenotype of sorbitol-negative *E. coli*, 28
Antibiotics
  Antibiotics in milk, 1338
Antibody
  Egg yolk antibodies and *Salmonella* shedding in pigs, 267
Antifungal
  A maize protein with antifungal activity, 120
  A new maize trypsin inhibitor, 185
Antilisterial activity
  Effectiveness of essential oils against *Listeria*, 1209
Antimicrobial(s)
  Antimicrobial resistance in *Salmonella* isolates from Mexican foods, 966
  Cannoli shelf life, 2553
  Morphology, release characteristics, and antimicrobial effect, 2293
  Olive glutaraldehyde-like compounds, 2611
  Reduction of *E. coli* O157:H7 and *Salmonella* by lactic and citric acids, 2208
Antimicrobial activity
  Antimicrobial and antioxidant activity of rosemary extracts, 1744
  Growth inhibition mode of action on selected benzoic acid derivatives, 791
Antimicrobial agents
  E. coli O157:H7 control in lettuce processing water, 1392
Antimicrobial effect
  Reduction of *S. aureus* in Turkish-type fermented sausage using nisn, 1739

Antimicrobial packaging
Effect of pectin-nisin films and radiation on *Listeria*, 644
Antimicrobial peptides
Sodium caseinate fermentate inactivates *E. sakazakii*, 340
Antimicrobial residues
Antimicrobial residues in Brazilian pasteurized milk, 911
Antimicrobial resistance
Antimicrobial exposure and resistance in *Campylobacter* from pigs, 482
Antimicrobial resistance in bacteria on retail turkey meat, 473
E. coli growth response, 2301
Pathogenic bacteria in sheep, 1713
Prevalence and antimicrobial resistance of *Salmonella*, 1165
Resistance in food *E. coli* in Tunis, 1082
Salmonella from chickens and restaurants in Senegal, 2423
Salmonella on broiler carcasses, 1610
Swine environment sampling methods for *Salmonella*, 142
Antimicrobial susceptibility test
S. aureus in pork and chickens, 608
Antioxidant activity
Antimicrobial and antioxidant activity of rosemary extracts, 1744
Antipathogenic agent
Effect of green tea polyphenol on pathogenicity of *E. coli* O157:H7, 325
Appetizers
Field validation of predictive models, 101
Apple cider
Patulin surveillance in apple cider and juice, 1255
Pulsed light inactivation of *E. coli* in apple juice and cider, 937
RFEF inactivation of *L. plantarum* in apple cider, 656
Apple juice
Disinfectants and *A. acidoterrestris*, 510
Identification of an interfering substrate in apple juice, 805
Modeling of *P. expansum* resistance, 2618
Pulsed light inactivation of *E. coli* in apple juice and cider, 937
Apple polyphenols
Facilitated thermal inactivation of *E. coli* O157:H7, 860
Apples
Crop treatment effects on phyllosphere microbial flora, 2321
Patulin production influenced by apple variety and storage temperature, 1030
Applied research
A novel approach to enhance food safety, 1509
Appropriate level of protection (ALOP)
Risk management metrics using a quantitative risk assessment, 2151
Arcobacter
Arcobacter in meat and shellfish, 1102
Arcobacter detection
Enrichment PCR for detection of *Arcobacter* spp. in chicken meat, 1491
Arctic
Infectivity of *T. gondii* in country foods, 1756
Artisan
Detection of *Listeria* spp. in artisan cheese processing facilities, 2499
Aseptically packed
Thermal inactivation of *C. botulinum* spores in rice, 2400
Aspergillus
Fungal flora and mycotoxins of Romanian cereals, 662
Aspergillus flavus
A maize protein with antifungal activity, 120
A new maize trypsin inhibitor, 185
Biocontrol of aflatoxin in corn, 801
Assurance GDS
Listeria detection, 674
Attachment
Attachment of *Listeria* and *Salmonella* to shrimp, 1181
Biofilm formation by *Salmonella* Typhimurium DT104, 1841
Attribution
Food attribution using outbreak data from Canada, 1963
Autochthonous strains
Autochthonous strains of lactic acid bacteria, 189
Avian influenza
Thermal inactivation of avian influenza virus in dried egg white, 1997
Bacillus
Assay of AS-48 in desserts, 1654
Bacillus spore susceptibility to biocides, 360
Concentration of spores by CFC, 666
Bacillus amyloliquefaciens
Influence of pressurization rate on spore lethality, 775
Bacillus cereus
B. cereus in milk, 1301
B. cereus in rice, 2386
Characterization of cereal-related *B. cereus* strains in Korea, 612
Growth modeling of *B. cereus* in cooked rice, 1296
Prevalence and toxigenic profiles of *B. cereus*, 578
Transfer of *B. cereus* from packaging paper, 2236
Bacillus sp.
Biocontrol of human pathogens on bell pepper, 85
Bacillus spp.
HGM and ATR-IR microscopy for *Bacillus* differentiation, 1909
Bacteria
Characterization on day-of-hatch chicken cecal microflora, 959
Crop treatment effects on phyllosphere microbial flora, 2321
Detection of histamine-producing bacteria in fish, 1987
Microbial quality of ground beef, 1722
Microbiological survey of produce in Alberta, Canada, 415
Bacterial adaptation
E. coli growth response, 2301
Bacterial attachment
Surrogate selection for *E. coli* O157:H7, 1385
Bacterial indicators
Bacteriological quality of shellfish, 1443
Bacterial pathogens
HUF for recovering multiple pathogens in foods, 2547
Bacterial stress responses
Effect of stress on *L. monocytogenes* resistance to UV light, 1634
Bacterial surrogate
Surrogate selection for *E. coli* O157:H7, 1385
Bactericidal
Bactericidal activity of lactoferrin and its derivatives in ground beef, 760
Bacteriocin(s)
Application of bacteriocins in sous vide products, 515
Assay of AS-48 in desserts, 1654
Behavior of *L. monocytogenes* in Greek Graviera cheese, 531
Biopreservation potential of an *E. faecalis* N1-33 bacteriocin, 524
Enterocin AS-48 assay in drinks, 881
Impact of thermization treatments on raw milk flora, 783
Purification of pentocin 31-1, 2524
Bacteriophage(s)
Bacteriophage against *E. coli* O157:H7 in cattle, 241
Biocontrol of *Salmonella* on tomatoes, 2284
Effectiveness of bacteriophages on *E. coli* O147:H7 on fresh-cut produce, 1481
Group II bacteriophage to reduce *Campylobacter*, 733
Bacteriophage inactivation
HPV for the environmental control of bacteriophage, 412
Inactivation of *L. plantarum* phages, 1012
Bacteriophage MS2
Chitosan effects on human enteric viral surrogates, 2623
Bacteroides fragilis phage B40-8
Decontamination of shredded iceberg lettuce, 1047
Beef
Antilisterial activity of lyophilized pomegranate juice, 2508
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
Microbial quality of ground beef, 1722
M. paratuberculosis with beef cattle at processing, 1457
Plant extracts and microbiological carcass contamination, 147
Reduction of *E. coli* O157:H7 and *Salmonella* by lactic and citric acids, 2208
Resistance genes in *E. coli*, 1089
Spoilage and safety characteristics of beef, 2278
Survival of heat-shocked *E. coli* O157:H7 in ground beef, 1727

Beef carcass
Diversity and susceptibility of *Enterococcus*, 766
Effects of carcass decontamination, 1790
Surrogates for enteric pathogens on beef carcasses, 295
Beef carcass sponge samples
Preparing carcass sponge samples, 428
Beef cattle
Genotype and phenotype of sorbitol-negative *E. coli*, 28
Beef jerky
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Beef slaughter
Predicting *Salmonella* contamination of beef carcasses, 260
Bell pepper
Biocontrol of human pathogens on bell pepper, 85
Benzoates
Growth inhibition mode of action on selected benzoic acid derivatives, 791
Benzoic acid
Listeria growth and growth boundary model, 2132
β-Agonist
β-Agonists and *E. coli* O157:H7 in feedlot cattle, 2587
β-*N*-Methylamino-L-alanine (BMAA)
Determination of the cyanobacterial toxin β-*N*-methylamino-L-alanine, 1769
Bias
Bias of *Salmonella* cultivation, 707
Bifidobacterium
Multiplex PCR detection of LAB in commercial dairy products, 93
Bigelow model
Modeling of *P. expansum* resistance, 2618
Binding capacity
Autochthonous strains of lactic acid bacteria, 189
Biocide
Bacillus spore susceptibility to biocides, 360
Inactivation of *L. plantarum* phages, 1012
Biocontrol
Biocontrol of *Salmonella* on tomatoes, 2284
Biodefense
Egg yolk botulinum toxin antibody, 1005
Biofilm(s)
Adherence of *Listeria monocytogenes*, 1885
Biofilm formation by *Salmonella* Typhimurium DT104, 1841
Biofilm formation of *L. monocytogenes*, 1476
Characterization of 7-day-old chicken cecal microflora, 1812
Characterization on day-of-hatch chicken cecal microflora, 959
E. coli O157:H7 biofilm formation, 157
Sanitizers against *L. monocytogenes* biofilms on cutting boards, 990
Ultrasound and ozone treatment of *L. monocytogenes* biofilm, 1306
Biogenic amine(s)
Detection of histamine-producing bacteria in fish, 1987
Effect of gutting on quality of European hake, 1671
Production of biogenic amines by *O. oeni*, 907
Biological control
Biocontrol of aflatoxin in corn, 801
Biological strategies
Biological strategies to counteract the effects of mycotoxins, 2006
Biopreservation
Biopreservation of seafood products, 365
Biopreservative
Biopreservation potential of an *E. faecalis* N1-33 bacteriocin, 524
Biosecurity
Inactivation of *Y. pestis* in ground beef, 564
Biphasic model
Modeling of *P. expansum* resistance, 2618
Bisphenol A
BPA from can coating, 2571
Bivalve molluscs
Bacteriological quality of shellfish, 1443
Black aspergilli
L. botrana field control and ochratoxin A in grapes, 894
Blood cell concentrate
Blood cell concentrate and rind in a salami-type sausage, 826
Blown pack spoilage
Temperature and pH effects on microflora in blown packs, 2380
Bornyl acetate
Acaricidal activity of *J. chinensis* leaf oil, 1686
Botrytis cinerea
Food additives to control postharvest stone fruit decay, 1037
Bottle handling
Growth of *Cronobacter* spp. during cooling, 2489
Botulinum neurotoxin
Egg yolk botulinum toxin antibody, 1005
Bovine feces
Detection of Shiga toxin, 741
Bovine spongiform encephalopathy
Impact of changes to BSE surveillance in Japan, 1463
PCR detection of highly processed whale meat, 1496
Real-time PCR for detection of MBM in animal feeds, 1055
Bovine spongiform encephalopathy risk control
CNS tissue contamination detection, 1063
Brazil
Antimicrobial residues in Brazilian pasteurized milk, 911
Microbiological quality of spices, 421
Breast milk
Aflatoxin M_1 in human breast and raw milk in Turkey, 885
Brine
Dose of UV light required to inactivate *L. monocytogenes*, 2144
Effect of stress on *L. monocytogenes* resistance to UV light, 1634
Use of chlorine dioxide in chilling brine, 2272
Broiler
Campylobacter rapid test, 2483
Evaluation of *Campylobacter* recovery methodology, 972
Salmonella on broiler carcasses, 1610
Broiler carcass rinses
Enumeration of pathogens in broiler carcass rinses, 1099
Broiler chickens
Salmonella in broiler chickens, 2202
Broiler meat
Filters to isolate *Campylobacter* spp. from retail broiler meat, 2592
Bromitize
DBDMH-reduced pathogens on fresh meat, 151
Brushing
Spray washing of tomatoes using ClO_2, 2448
Butter
L. monocytogenes in some ready-to-eat foods, 1869

Caco-2 cell culture
Mannoproteins affect *C. jejuni* adherence and invasion of Caco-2 cells, 55
Calcium chloride
Use of chlorine dioxide in chilling brine, 2272
Campylobacter
Antibacterial action of chitosan on *Campylobacter* spp., 1735
Antimicrobial exposure and resistance in *Campylobacter* from pigs, 482
Antimicrobial resistance in bacteria on retail turkey meat, 473
Campylobacter and *E. coli* O157 in cattle, 490
Campylobacter in retail poultry in Northern Ireland, 1830
Campylobacter pre- and posttransport, 43
Campylobacter rapid test, 2483
Chemical decontamination of *C. jejuni* on chicken, 1173
Enumeration of pathogens in broiler carcass rinses, 1099
Evaluation of *Campylobacter* recovery methodology, 972
Filters to isolate *Campylobacter* spp. from retail broiler meat, 2592
Food safety of products from organic livestock systems, 2629
Genetic diversity of *Campylobacter* on broiler carcasses, 49
Gentamicin-resistant *Campylobacter* strain in poultry research, 1288
Group II bacteriophage to reduce *Campylobacter*, 733
Monoclonal antibody to *C. jejuni*, 870

Reduction of *Campylobacter* by physical decontamination, 497
Transfer of *Campylobacter* to domestic cutting surfaces, 1836
Campylobacter coli
Detection of *Campylobacter* in poultry, 1718
Group II bacteriophage to reduce *Campylobacter*, 733
Mini VIDAS for the detection of *Campylobacter* spp. on broiler meat, 2428
Campylobacter jejuni
Detection of *Campylobacter* in poultry, 1718
Group II bacteriophage to reduce *Campylobacter*, 733
Mannoproteins affect *C. jejuni* adherence and invasion of Caco-2 cells, 55
Mini VIDAS for the detection of *Campylobacter* spp. on broiler meat, 2428
Can coating
BPA from can coating, 2571
Cannoli
Cannoli shelf life, 2553
Cantaloupe(s)
Acidified compounds on cantaloupes, 2453
Effectiveness of bacteriophages on *E. coli* O147:H7 on fresh-cut produce, 1481
Capillary electrophoresis single-strand conformation polymorphism (CE-SSCP)
Sensitive pathogen identification using PCR-based CE-SSCP, 1262
Caprylic acid
Caprylic acid reduces *Salmonella* Enteritidis colonization in chicks, 722
Carboxylic acids
Campylobacter pre- and posttransport, 43
Carcass
M. paratuberculosis with beef cattle at processing, 1457
Carcass breaking
Effects of carcass decontamination, 1790
Carcass decontamination
Surrogates for enteric pathogens on beef carcasses, 295
Carcass rinsate
Evaluation of *Campylobacter* recovery methodology, 972
Carnitine
Carnitine—friend or foe?, 1293
Carvacrol
Pathogen inactivation on lettuce and spinach by volatile antimicrobials, 2046
Cattle
Bacteriophage against *E. coli* O157:H7 in cattle, 241
β-Agonists and *E. coli* O157:H7 in feedlot cattle, 2587
Campylobacter and *E. coli* O157 in cattle, 490
E. coli O157:H7 lineages from cattle and clinical human isolates, 601
E. coli O157 in cattle fed corn distillers grains 1624
E. coli O157 on cattle farms and risk factors, 1848
M. paratuberculosis with beef cattle at processing, 1457
SRP *E. coli* O157:H7 vaccine effects in cattle, 866
VTEC O157H7in Swedish cattle, 1709
Ceca
Characterization of 7-day-old chicken cecal microflora, 1812
Serology monitoring and cecal *Salmonella* carriage of slaughter pigs, 286
Cecum
Characterization on day-of-hatch chicken cecal microflora, 959
Cell culture
Concentration method of enteric viruses from foods, 2001
Cellulose
Transfer of *Salmonella* from water to parsley, 618
Cellulose filter
Filters to isolate *Campylobacter* spp. from retail broiler meat, 2592
Central nervous system
CNS tissue detection, 1070
Central nervous system tissue detection
CNS tissue contamination detection, 1063
Cereal
Characterization of cereal-related *B. cereus* strains in Korea, 612
Certified kitchen manager
Certified kitchen managers and inspection outcomes, 384
Chagas' disease
Chagas' disease and foods, 441
Cheese
Detection of *Listeria* spp. in artisan cheese processing facilities, 2499
L. monocytogenes in some ready-to-eat foods, 1869
Chemical decontamination
Chemical decontamination of *C. jejuni* on chicken, 1173
Chicken
Campylobacter in retail poultry in Northern Ireland, 1830
Campylobacter rapid test, 2483
Caprylic acid reduces *Salmonella* Enteritidis colonization in chicks, 722
Characterization of 7-day-old chicken cecal microflora, 1812
Characterization on day-of-hatch chicken cecal microflora, 959
Prevalence and antimicrobial resistance of *Salmonella*, 1165
Reduction of *Campylobacter* by physical decontamination, 497
Risk analysis of *Listeria* in RTE chicken meat products, 67
Salmonella from chickens and restaurants in Senegal, 2423
Thermal inactivation of avian influenza virus in dried egg white, 1997
Chicken carcass
Detection of *Campylobacter* in poultry, 1718
Chicken meat
Chemical decontamination of *C. jejuni* on chicken, 1173
E. coli and enterococcus contamination in steamed chicken meat, 1821
Enrichment PCR for detection of *Arcobacter* spp. in chicken meat, 1491
Chicken meat preparation
Illness due to *Salmonella* in chicken meat preparation, 2093
Chicken skin
Chemical decontamination of *C. jejuni* on chicken, 1173
Model for survival and growth of *Salmonella* on chicken skin, 304
Chilling
Reduction of *Campylobacter* by physical decontamination, 497
Chinese mitten crabs
V. parahaemolyticus in Chinese mitten crabs (*E. sinensis*), 60
Chitosan
Antibacterial action of chitosan on *Campylobacter* spp., 1735
Chitosan effects on human enteric viral surrogates, 2623
Chlorine dioxide
Spray washing of tomatoes using ClO_2, 2448
Use of chlorine dioxide in chilling brine, 2272
Chlorine dioxide gas
ClO_2 gas applications in the laboratory, 952
Cider
Patulin production influenced by apple variety and storage temperature, 1030
Ciguatera
Species identification of grouper, 2375
Cinnamaldehyde
Pathogen inactivation on lettuce and spinach by volatile antimicrobials, 2046
Ciprofloxacin resistant
Ciprofloxacin-resistant *Salmonella* in Taiwan, 14
Citric acid
Listeria growth and growth boundary model, 2132
Clinical isolates
E. coli O157:H7 lineages from cattle and clinical human isolates, 601
Clinical symptoms
Tetramine poisoning and toxin concentrations in whelk, 1935
Clostridium
Concentration of spores by CFC, 666
Clostridium botulinum
Thermal inactivation of *C. botulinum* spores in rice, 2400
Clostridium difficile
C. difficile in ground meat in Sweden, 1732
Clostridium estertheticum
Temperature and pH effects on microflora in blown packs, 2380
Clostridium perfringens
C. perfringens risk assessment, 1376
Comparison between the VIDAS method and PCR in dry sausage, 1977

Risk management metrics using a quantitative risk assessment, 2151
Clustering
Epidemiology of human listeriosis in Italy, 876
Cohort study
Foodborne outbreak due to norovirus, Austria, 2007, 193
Cold-smoked meat products
L. monocytogenes in RTE meat products in Latvia, 1283
Cold-smoked salmon
Biopreservation of seafood products, 365
Coliform count
Preparing carcass sponge samples, 428
Collagenous rind protein
Blood cell concentrate and rind in a salami-type sausage, 826
Colletotrichum gloeosporioides
C. gloeosporioides growth–no-growth interface, 1427
Color
γ-Radiation of fresh pork meat, 556
Color determination
E. americana extract as an additive in homemade salad dressing, 650
Combination treatment
Combination treatment for seed decontamination, 631
Commercial processing
Effects of carcass decontamination, 1790
Commercial salad
E. coli O157:H7 growth on baby spinach, 2038
Compact Dry VP method
Screening method for *V. parahaemolyticus*, 169
Comparison study
Enumeration of pathogens in broiler carcass rinses, 1099
Compatible solute
Carnitine—friend or foe?, 1293
Competitive bacteria
Microbial antagonists of *E. coli* O157:H7 on lettuce and spinach, 1569
Compost
Fecal indicators in market-ready composts, 332
Concentration
Sample preparation, 1774
Consumer product safety
CNS tissue detection, 1070
Contamination
Colonization of spinach by *E. coli* O157:H7, 1521
E. coli and enterococcus contamination in steamed chicken meat, 1821
L. monocytogenes in egg, 178
A novel approach to enhance food safety, 1509
Persistence of *E. coli* on injured lettuce, 458
Continuous flow centrifugation
Concentration of spores by CFC, 666
Control
Control of *L. monocytogenes* on frankfurters with hops beta acids, 702
Conventional
Crop treatment effects on phyllosphere microbial flora, 2321
Conveyor
Ultrasonic cleaning of a pilot-scale conveyor, 408
Cooked rice
Growth modeling of *B. cereus* in cooked rice, 1296
Cooked shrimp
Biopreservation of seafood products, 365
Cooking
Fate of *E. coli* O157:H7 in cooked nonintact beef, 1404
Corn
Biocontrol of aflatoxin in corn, 801
Fumonisins in maize and agricultural practices, 898
Cost-of-illness
Economic cost of foodborne illness, 128
Evaluation of food safety education, 137
Country food
Infectivity of *T. gondii* in country foods, 1756
Critical violations
Certified kitchen managers and inspection outcomes, 384
Cronobacter
C. sakazakii in neonatal mice, 2363
Cronobacter detection methods, 1472
Cronobacter Enrichment Broth (CEB)
Cronobacter detection methods, 1472
Crop
Campylobacter pre- and posttransport, 43
Cross-contamination
Diversity and susceptibility of *Enterococcus*, 766
E. coli O157:H7 control in lettuce processing water, 1392
Cross-protection
Effect of stress on *L. monocytogenes* resistance to UV light, 1634
Crust freezing
Reduction of *Campylobacter* by physical decontamination, 497
Cryotolerance
Surrogate selection for *E. coli* O157:H7, 1385
Cryptosporidium
Cryptosporidium and *Giardia* and fresh produce, 2184
Microbiological survey of produce in Alberta, Canada, 415
^{137}Cs
Radiometric analysis of farmed fish, 1941
Cucumis melo
Effectiveness of bacteriophages on *E. coli* O147:H7 on fresh-cut produce, 1481
Culture conditions
E. coli O157:H7 biofilm formation, 157
Preinoculation culture conditions, 1553
Culture isolation
Listeria detection, 674
Culture media
Bias of *Salmonella* cultivation, 707
Cupric sulfate
Synergistic antifungal activity against *P. digitatum*, 1660
Curli
Transfer of *Salmonella* from water to parsley, 618
Cutting boards
Sanitizers against *L. monocytogenes* biofilms on cutting boards, 990

Dairy cultures
A genetic marker for distinguishing *L. gravieae* biotypes, 1248
Dairy food safety
Quantitative microbial risk assessment for *S. aureus* in raw milk, 1641
Dairy manure compost
E. coli O157:H7 regrowth in dairy compost, 1576
Decontamination
Decontamination of shredded iceberg lettuce, 1047
Effects of carcass decontamination, 1790
Dehydrator
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Deli meats
Risk assessment for *L. monocytogenes* in selected deli meats, 978
Delphi technique
Food safety risks during pregnancy, 680
Denaturing gradient gel electrophoresis (DGGE)
Molecular analysis of milk spoilage bacteria by PCR and DGGE, 572
Deoxynivalenol
Fungal flora and mycotoxins of Romanian cereals, 662
Predicting DON in wheat, 2170
Depletion
Residue depletion of doramectin in rabbit tissues, 2189
Depuration
Bacteriological quality of shellfish, 1443
Dermatophagoides spp.
Acaricidal activity of *J. chinensis* leaf oil, 1686
Dessert
Assay of AS-48 in desserts, 1654
Detection
Detection assay for staphylococcal enterotoxins, 2538
Detection of allergen in walnut by PCR, 2433

Detection of a norovirus surrogate in food, 2178
Detection of attached bacteria on inert surfaces by real-time PCR, 1310
Detection of *Campylobacter* in poultry, 1718
Detection of *Listeria* spp. in artisan cheese processing facilities, 2499
Detection of Shiga toxin, 741
E. coli O157 enrichment methods, 669
Environmental sampling and detection methods for *Listeria* spp., 696
fliC$_{h7}$ PCR and H7 latex agglutination test, 2195
F. tularensis detection in foods, 1156
Ricin deadenylase activity in juice, 903
Sample preparation, 1774
Detection methods
Detection of histamine-producing bacteria in fish, 1987
Detection reagents
Egg yolk botulinum toxin antibody, 1005
Detergent
Antimicrobial efficacy of fresh produce disinfectants, 1486
Determination
Residue depletion of doramectin in rabbit tissues, 2189
Detoxification
Biological strategies to counteract the effects of mycotoxins, 2006
Developing country
Histamine in fish from markets, 1112
Diarrhea
E. coli O157:H7 on salad leaves causes human infection, 1531
1,3-Dibromo-5,5-dimethylhydantoin (DBDMH)
DBDMH-reduced pathogens on fresh meat, 151
Didecyldimethylammonium chloride
The ineffectiveness of produce sanitizers, 2413
Diet
E. coli O157 in cattle fed corn distillers grains, 1624
Dietary daily consumption
PCB, OCP, and PAH in seafood marketed in Campania, 1677
Differentiation
Detection of *Campylobacter* in poultry, 1718
Digestive tract
Plant extracts and microbiological carcass contamination, 147
Dioxins
Food safety of products from organic livestock systems, 2629
Direct quantification
Concentration of bacteria from food and blood, 1225
Dishwashers
Sanitization of tableware used in restaurants, 1315
Disinfectant
Antimicrobial efficacy of fresh produce disinfectants, 1486
Disinfectants and *A. acidoterrestris*, 510
The ineffectiveness of produce sanitizers, 2413
Disinfection
Bacillus spore susceptibility to biocides, 360
TiO_2 photocatalytic disinfection of iceburg lettuce, 1916
Y. pseudotuberculosis disinfection, 392
Distillers grains
E. coli O157 in cattle fed corn distillers grains, 1624
Diversity
Diversity of *L. monocytogenes* heat resistance, 999
DNA
Verifying the origin of meat mixtures, 1948
DNA barcoding
Public health response to puffer fish (tetrodotoxin) poisoning, 810
DNA probe
Detection of *V. parahaemolyticus* and *V. vulnificus* in PHP oysters, 2106
Domiati cheese
Antibiotic resistance markers in Egyptian cheese, 624
Doramectin
Residue depletion of doramectin in rabbit tissues, 2189
Drought stress
E. coli O157 response to heat and drought stress in lettuce, 2471
Drying
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Dry sausage
Comparison between the VIDAS method and PCR in dry sausage, 1977
DT104
Salmonella Typhimurium DT104 in liquid egg products, 1992
D-value
Inactivation of *Y. pestis* in ground beef, 564
Salmonella in peanut butter, 1596
Dynamic temperature
Growth of *Cronobacter* spp. during cooling, 2489

Ear samples
VTEC O157H7in Swedish cattle, 1709
Edible coating
Cannoli shelf life, 2553
Egg
Salmonella Typhimurium DT104 in liquid egg products, 1992
Thermal inactivation of avian influenza virus in dried egg white, 1997
Egg antibody
Egg yolk botulinum toxin antibody, 1005
Egg yolk
Egg yolk antibodies and *Salmonella* shedding in pigs, 267
Electrochemiluminescence
Ricin deadenylase activity in juice, 903
Electrolyzed water
Reduction of *E. coli* O157:H7 with electrolyzed water, 1854
Electrospun
Morphology, release characteristics, and antimicrobial effect, 2293
Eleutherine americana
Assessment of *E. americana* and its bioactive compounds, 354
E. americana extract as an additive in homemade salad dressing, 650
Energy drinks
Enterocin AS-48 assay in drinks, 881
Enrichment
Enrichment of STEC in swine wastes, 1982
Evaluation of *Campylobacter* recovery methodology, 972
Strategies for rapid detection of *E. coli* O157, 1862
Enrichment kits
E. coli O157 enrichment methods, 669
Enrichment PCR
Enrichment PCR for detection of *Arcobacter* spp. in chicken meat, 1491
Enteric disease
Food attribution using outbreak data from Canada, 1963
Enteric virus
Concentration method of enteric viruses from foods, 2001
Enterobacter asburiae JX1
Biocontrol of *Salmonella* on tomatoes, 2284
Enterobacteria
Colonization of spinach by *E. coli* O157:H7, 1521
Enterobacteriaceae
Crop treatment effects on phyllosphere microbial flora, 2321
DBDMH-reduced pathogens on fresh meat, 151
Microbial quality of soft drinks, 2607
Predicting *Salmonella* contamination of beef carcasses, 260
Enterobacteriaceae count
Preparing carcass sponge samples, 428
Enterobacter sakazakii
Cronobacter detection methods, 1472
C. sakazakii in neonatal mice, 2363
E. sakazakii in infant formula and milk kitchens, 37
Growth of *Cronobacter* spp. during cooling, 2489
Microbiological quality of seed sprouts, 856
Enterobacter sakazakii inactivation
Sodium caseinate fermentate inactivates *E. sakazakii*, 340
Enterocins
Behavior of *L. monocytogenes* in Greek Graviera cheese, 531
Enterococci
E. coli and enterococcus contamination in steamed chicken meat, 1821
Impact of thermization treatments on raw milk flora, 783
Enterococcus
Diversity and susceptibility of *Enterococcus*, 766

Enterococcus faecium
Behavior of *L. monocytogenes* in Greek Graviera cheese, 531
Enterohemolysin
Genotype and phenotype of sorbitol-negative *E. coli*, 28
Enterohemorrhagic *Escherichia coli*
E. coli O157:H7 on salad leaves causes human infection, 1531
Enterotoxin
B. cereus in rice, 2386
Characterization of cereal-related *B. cereus* strains in Korea, 612
Detection assay for staphylococcal enterotoxins, 2538
Quantitative microbial risk assessment for *S. aureus* in raw milk, 1641
Enumeration
Small U.S. abattoirs, 1272
Transfer of *Campylobacter* to domestic cutting surfaces, 1836
Environment
L. monocytogenes in retail establishments, 2337
Swine environment sampling methods for *Salmonella*, 142
Environmental contamination
HPV for the environmental control of bacteriophage, 412
Environmental factors
E. coli O157:H7 regrowth in dairy compost, 1576
Environmental parameters
Nonculturable response of APE on plants, 1342
Environmental samples
Norovirus in environmental swabs, 111
Norovirus on food handlers' hands, 1753
Environmental sampling
Detection of *Listeria* spp. in artisan cheese processing facilities, 2499
Environmental sampling and detection methods for *Listeria* spp., 696
Environmental swabs
Norovirus in environmental swabs, 111
Norovirus on food handlers' hands, 1753
Enzyme-linked immunosorbent assay (ELISA)
Aflatoxin M_1 in human breast and raw milk in Turkey, 885
Antimicrobial residues in Brazilian pasteurized milk, 911
Monoclonal antibody to *C. jejuni*, 870
Serology monitoring and cecal *Salmonella* carriage of slaughter pigs, 286
Epidemiology
Epidemiology of human listeriosis in Italy, 876
Epigallocatechin gallate
Effect of green tea polyphenol on pathogenicity of *E. coli* O157:H7, 325
Eriocheir sinensis
V. parahaemolyticus in Chinese mitten crabs (*E. sinensis*), 60
Error
Error splitting for microbial inactivation, 843
Escherichia coli
Antimicrobial resistance in bacteria on retail turkey meat, 473
E. coli after isoelectric solubilization and precipitation, 1398
E. coli and enterococcus contamination in steamed chicken meat, 1821
E. coli growth response, 2301
Effects of carcass decontamination, 1790
Enumeration of pathogens in broiler carcass rinses, 1099
Error splitting for microbial inactivation, 843
Fecal indicators in market-ready composts, 332
fliC$_{h7}$ PCR and H7 latex agglutination test, 2195
High-pressure inactivation of *E. coli* O157:H7 in tomato juice, 2407
Microbial quality of ground beef, 1722
Microbiological quality of edible nut kernels, 853
Modeling thermal inactivation of *E. coli* K-12, 399
Persistence of *E. coli* on injured lettuce, 458
Preinoculation culture conditions, 1553
Pulsed light inactivation of *E. coli* in apple juice and cider, 937
Q. infectoria alters Shiga toxigenic *E. coli* cell surface properties, 1699
Resistance genes in *E. coli*, 1089
Resistance in food *E. coli* in Tunis, 1082
Sanitization of tableware used in restaurants, 1315
Escherichia coli ATCC 25922
Surrogate selection for *E. coli* O157:H7, 1385
Escherichia coli count
Preparing carcass sponge samples, 428
Escherichia coli O157
DBDMH-reduced pathogens on fresh meat, 151
E. coli O157 on cattle farms and risk factors, 1848
Escherichia coli O157:H7
Acid resistance of *E. coli* O157:H7, 503
Antimicrobial treatment for produce and poultry, 928
Association of *E. coli* O157:H7 with flies from leafy greens, 1547
Bacteriophage against *E. coli* O157:H7 in cattle, 241
β-Agonists and *E. coli* O157:H7 in feedlot cattle, 2587
Campylobacter and *E. coli* O157 in cattle, 490
Colonization of spinach by *E. coli* O157:H7, 1521
Combination treatment for seed decontamination, 631
Comparison between the VIDAS method and PCR in dry sausage, 1977
Comparison of pathogen test kits for leafy greens, 2461
Decontamination of shredded iceberg lettuce, 1047
E. coli biotype I as a surrogate for *E. coli* O157, 728
E. coli O157 enrichment methods, 669
E. coli O157:H7 and *Salmonella* on beef cattle hides, 1267
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
E. coli O157:H7 biofilm formation, 157
E. coli O157:H7 contamination of spinach leaves, 2313
E. coli O157:H7 control in lettuce processing water, 1392
E. coli O157:H7 growth on baby spinach, 2038
E. coli O157:H7 inactivation in lemon and lime juices, 235
E. coli O157:H7 in spinach cultivated in soil and hydroponic medium, 1513
E. coli O157:H7 lineages from cattle and clinical human isolates, 601
E. coli O157:H7 on field-cored lettuce, 465
E. coli O157:H7 regrowth in dairy compost, 1576
E. coli O157 in cattle fed corn distillers grains, 1624
E. coli O157 response to heat and drought stress in lettuce, 2471
Effectiveness of bacteriophages on *E. coli* O147:H7 on fresh-cut produce, 1481
Effect of green tea polyphenol on pathogenicity of *E. coli* O157:H7, 325
Enrichment of STEC in swine wastes, 1982
Evaluating *L. sakei* inhibition of pathogen growth, 251
Facilitated thermal inactivation of *E. coli* O157:H7, 860
Fate of *E. coli* O157:H7 in cooked nonintact beef, 1404
Fate of *E. coli* O157:H7 on fresh lettuce and spinach, 1560
Fate of pathogens on kippered beef, 403
Inactivation of foodborne pathogens with household compounds, 1201
Lack of internalization of *E. coli* O157:H7 in lettuce, 2028
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Mathematical estimation of pathogen lag phase and growth rate, 1190
Microbial antagonists of *E. coli* O157:H7 on lettuce and spinach, 1569
Microbiological quality of seed sprouts, 856
A novel approach to enhance food safety, 1509
Pathogenic bacteria in sheep, 1713
Pathogen inactivation on lettuce and spinach by volatile antimicrobials, 2046
Pathogen inactivation on tomato by vapor-phase antimicrobials, 315
Predicting pathogen growth in raw pork, 2114
Predicting pathogen growth in raw sausage, 75
Reduction of *E. coli* O157:H7 and *Salmonella* by lactic and citric acids, 2208
Reduction of *E. coli* O157:H7 with electrolyzed water, 1854
Small U.S. abattoirs, 1272
Specificity of phage ligand for *E. coli* O157 serogroup, 1078
Spinach decontamination by gaseous ozone, 1538
Spoilage and safety characteristics of beef, 2278
Spoilage in risk assessment, 425
SRP *E. coli* O157:H7 vaccine effects in cattle, 866
Surface disinfection treatments for lettuce, 228
Surrogate selection for *E. coli* O157:H7, 1385
Survival of heat-shocked *E. coli* O157:H7 in ground beef, 1727
Transfer of *E. coli* O157:H7 to lettuce plants, 2308
Using lactic acid bacteria to validate jerky-making process lethality, 1234
Validation of interventions in tenderized and injected beef, 1616

Escherichia coli O157:H7 surrogates
Surrogates for enteric pathogens on beef carcasses, 295
Escherichia coli O26 VTEC
E. coli O26 VTEC in buffalo milk, 1705
Essential oils
Effectiveness of essential oils against *Listeria*, 1209
Establishment performance
Meat and poultry *Salmonella* control performance, 6
Etiology
FBD outbreaks: determination of etiologic agent, 1958
Exposure assessment
Monitoring fumonisin in agricultural products, 436
Extended shelf life
B. cereus in milk, 1301

Fallen stock
Impact of changes to BSE surveillance in Japan, 1463
Farmed fish
Radiometric analysis of farmed fish, 1941
Farmers market
Microbiological survey of produce in Alberta, Canada, 415
Farm occurrence
L. monocytogenes in the Irish farm environment, 1450
Farm type
E. coli O157 on cattle farms and risk factors, 1848
Fatty acids
γ-Radiation of fresh pork meat, 556
Fecal indicator
Fecal indicators in market-ready composts, 332
Fecal samples
VTEC O157H7in Swedish cattle, 1709
Fecal shedding
SRP *E. coli* O157:H7 vaccine effects in cattle, 866
Feedlot
Bacteriophage against *E. coli* O157:H7 in cattle, 241
Feeds
A rapid real-time PCR method for the detection of animal material, 2368
Feed withdrawal
Campylobacter pre- and posttransport, 43
Salmonella in broiler chickens, 2202
Feline calicivirus F-9
Chitosan effects on human enteric viral surrogates, 2623
Fermented milk
Preparation of nisin from *L. lactis* W8–fermented milk, 2615
Fermented sausage
Reduction of *S. aureus* in Turkish-type fermented sausage using nisn, 1739
Fertilizer
Internalization of *Salmonella* into tomatoes through irrigation water, 849
Field
Persistence of *E. coli* on injured lettuce, 458
Field coring
E. coli O157:H7 on field-cored lettuce, 465
Field trials
L. botrana field control and ochratoxin A in grapes, 894
Filth flies
Association of *E. coli* O157:H7 with flies from leafy greens, 1547
Fish
Detection of histamine-producing bacteria in fish, 1987
Determination of the cyanobacterial toxin β-*N*-methylamino-L-alanine, 1769
Fish allergen
Antibody specific to fish allergen, 818
Fishborne zoonotic trematodes
Fishborne zoonotic trematodes in raw fish dishes in Vietnam, 2394
Fish identification
Public health response to puffer fish (tetrodotoxin) poisoning, 810
Fish market
Histamine in fish from markets, 1112
Fish quality
Effect of gamma radiation on quality of rainbow trout, 1419
Fish transformation
Bacterial growth control during fish fermentation in Senegal, 1930
flaA
Genetic diversity of *Campylobacter* on broiler carcasses, 49
flgK
Biofilm formation by *Salmonella* Typhimurium DT104, 1841
fliC$_{h7}$ gene
fliC$_{h7}$ PCR and H7 latex agglutination test, 2195
Fludioxonil
Food additives to control postharvest stone fruit decay, 1037
9-Fluorenylmethyl chloroformate
Determination of the cyanobacterial toxin β-*N*-methylamino-L-alanine, 1769
Food
Detection of a norovirus surrogate in food, 2178
L. monocytogenes in retail establishments, 2337
P. nalgiovense toxicological assessment, 1666
Resistance in food *E. coli* in Tunis, 1082
Y. pseudotuberculosis disinfection, 392
Food additive
Assessment of *E. americana* and its bioactive compounds, 354
Foodborne
Foodborne outbreak due to norovirus, Austria, 2007, 193
Foodborne disease
FBD outbreaks: determination of etiologic agent, 1958
Foodborne illness
Colonization of spinach by *E. coli* O157:H7, 1521
Economic cost of foodborne illness, 128
Evaluation of food safety education, 137
High-risk food consumption and food safety practices, 2575
Listeriosis due to chicken salad consumption, 2602
Transfer of *E. coli* O157:H7 to lettuce plants, 2308
Foodborne outbreak
Chagas' disease and foods, 441
HUF for recovering multiple pathogens in foods, 2547
Norovirus in environmental swabs, 111
Norovirus on food handlers' hands, 1753
Transmission and survival of pathogens in the food environment, 202
Foodborne pathogen(s)
Antibacterial effect of green tea and rosemary, 1107
Bacterial stress and injury: a review, 1121
E. coli O157:H7 control in lettuce processing water, 1392
E. coli O157 response to heat and drought stress in lettuce, 2471
Enterocin AS-48 assay in drinks, 881
Food attribution using outbreak data from Canada, 1963
Lack of internalization of *E. coli* O157:H7 in lettuce, 2028
Photodynamic surface sanitation, 1020
Plant extracts and microbiological carcass contamination, 147
Sensitive pathogen identification using PCR-based CE-SSCP, 1262
Surface disinfection treatments for lettuce, 228
Food consumption patterns
High-risk food consumption and food safety practices, 2575
Food contact surfaces
Detection of attached bacteria on inert surfaces by real-time PCR, 1310
Food contamination
CNS tissue detection, 1070
Food handlers
Food safety knowledge retention study, 431
Food handling
Food safety knowledge retention study, 431
High-risk food consumption and food safety practices, 2575
Food model
Chemical decontamination of *C. jejuni* on chicken, 1173
Food packaging
Transfer of *B. cereus* from packaging paper, 2236
Food poisoning
Species identification of grouper, 2375

Food poisoning risk
Quantitative microbial risk assessment for *S. aureus* in raw milk, 1641
Food processing
Nitrate content in canned vegetable–based infant foods, 1764
Foods
Antimicrobial resistance in *Salmonella* isolates from Mexican foods, 966
F. tularensis detection in foods, 1156
Interlaboratory validation of a qPCR method for detecting *Salmonella*, 945
Food safety
Application of bacteriocins in sous vide products, 515
Crop treatment effects on phyllosphere microbial flora, 2321
Detection and isolation of *Salmonella* from food, 583
E. coli O26 VTEC in buffalo milk, 1705
Economic cost of foodborne illness, 128
Effectiveness of essential oils against *Listeria*, 1209
Fate of *E. coli* O157:H7 in cooked nonintact beef, 1404
Fate of listeriae on pork scrapple, 2530
Fate of pathogens on kippered beef, 403
Food safety knowledge retention study, 431
Food safety of products from organic livestock systems, 2629
Food safety risks during pregnancy, 680
Gentamicin-resistant *Campylobacter* strain in poultry research, 1288
High-risk food consumption and food safety practices, 2575
Inactivation of *Y. pestis* in ground beef, 564
Infectivity of *T. gondii* in country foods, 1756
Intake of essential minerals and metals, 1116
Listeriosis due to chicken salad consumption, 2602
Microbial characterization of saffron, 2217
Nonculturable response of APE on plants, 1342
A novel approach to enhance food safety, 1509
Tomato handling practices in restaurants, 1692
Food safety education
Evaluation of food safety education, 137
Food safety objective (FSO)
Risk management for steam meals, 2638
Food service establishments
S. aureus risk modeling in food services, 1897
Food storage
Nitrate content in canned vegetable-based infant foods, 1764
Foodstuffs
Concentration of bacteria from food and blood, 1225
Food supplements
Determination of the cyanobacterial toxin β-*N*-methylamino-L-alanine, 1769
Food vehicle
Food attribution using outbreak data from Canada, 1963
Food worker(s)
Salmonella outbreak due to an asymptomatic food worker, 2332
Tomato handling practices in restaurants, 1692
Transmission and survival of pathogens in the food environment, 202
Forecasting
Predicting DON in wheat, 2170
Fourier-transform infrared (FT-IR) microspectroscopy
HGM and ATR-IR microscopy for *Bacillus* differentiation, 1909
Fractional derivative
Microbial inactivation considering memory effects, 837
Francisella tularensis
F. tularensis detection in foods, 1156
Francisella tularensis LVS
Inactivation of *Y. pseudotuberculosis* and *F. tularensis* by HPP, 165
Frankfurters
Control of *L. monocytogenes* on frankfurters with hops beta acids, 702
Lauric arginate against *L. monocytogenes* on frankfurters, 1216
Y. pestis and frankfurters, 755
Free range
Food safety of products from organic livestock systems, 2629
Freeze tolerance
Trichinella survival in frozen pork, 2565
Fresh-cut produce
Effectiveness of essential oils against *Listeria*, 1209
Fresh produce
Colonization of spinach by *E. coli* O157:H7, 1521
Spinach decontamination by gaseous ozone, 1538
FRNA bacteriophages
FRNA bacteriophage as an indicator of norovirus in shellfish, 2358
Frozen
Survival of *Salmonella* in frozen chicken, 2088
Frozen storage
Reduction of *V. parahaemolyticus* in frozen oysters, 174
Fruit
Concentration method of enteric viruses from foods, 2001
Spray washing of tomatoes using ClO_2, 2448
Fumonisin(s)
Fumonisins in maize and agricultural practices, 898
Fumonisin surveillance in Japanese rice and wheat, 1327
Fungal flora and mycotoxins of Romanian cereals, 662
Monitoring fumonisin in agricultural products, 436
Fungal microflora
Fungal flora and mycotoxins of Romanian cereals, 662
Fungi
High pressure homogenization, 2561
P. nalgiovense toxicological assessment, 1666
Furanosyl borate diesters
Quorum sensing in *P. fragi*, 2597
Fusarium
Fungal flora and mycotoxins of Romanian cereals, 662
Predicting DON in wheat, 2170

Gamma radiation
Effect of gamma radiation on quality of rainbow trout, 1419
γ-Radiation of fresh pork meat, 556
Y. pestis and frankfurters, 755
Gaseous ozone
Spinach decontamination by gaseous ozone, 1538
Gelatin fiber
Morphology, release characteristics, and antimicrobial effect, 2293
General regression neural network model
Neural network model for survival and growth of *Salmonella*, 2078
Genetic diversity
Genetic diversity of *Campylobacter* on broiler carcasses, 49
Genetic marker
A genetic marker for distinguishing *L. gravieae* biotypes, 1248
Gentamicin resistance
Gentamicin-resistant *Campylobacter* strain in poultry research, 1288
Geotrichum candidum
Food additives to control postharvest stone fruit decay, 1037
Geraniol
Stored food mites and geraniol congeners, 1468
Giardia
Cryptosporidium and *Giardia* and fresh produce, 2184
Glutaraldehyde
Olive glutaraldehyde-like compounds, 2611
Good agricultural practices
E. coli O157:H7 on field-cored lettuce, 465
Gram negative
Crop treatment effects on phyllosphere microbial flora, 2321
Gram-negative bacteria
Concentration of bacteria from food and blood, 1225
Gram-positive bacteria
Concentration of bacteria from food and blood, 1225
Grana Padano
Antibiotic resistance of lactobacilli from cheese, 2162
Graviera cheese
Behavior of *Listeria* in Greek Graviera cheese, 2264
Behavior of *L. monocytogenes* in Greek Graviera cheese, 531
Green fluorescent protein
Transfer of *B. cereus* from packaging paper, 2236

Green tea
Antibacterial effect of green tea and rosemary, 1107
Ground-and-formed beef jerky
Using lactic acid bacteria to validate jerky-making process lethality, 1234
Ground beef
Facilitated thermal inactivation of *E. coli* O157:H7, 860
Inactivation of *Y. pestis* in ground beef, 564
Listeria detection, 674
Spoilage in risk assessment, 425
Ground meat
C. difficile in ground meat in Sweden, 1732
Ground nuts
Microbiological quality of edible nut kernels, 853
Group I *Clostridium botulinum*
Growth of group I *C. botulinum* at low and high temperatures, 375
Growth
Field validation of predictive models, 101
Model for survival and growth of *Salmonella* on chicken skin, 304
Modeling detection time of *L. monocytogenes* in frankfurters, 1878
Neural network model for survival and growth of *Salmonella*, 2078
Growth inhibition
Evaluating *L. sakei* inhibition of pathogen growth, 251
Growth inhibition mode of action on selected benzoic acid derivatives, 791
Growth–no growth interface
C. gloeosporioides growth–no-growth interface, 1427
Growth–no growth prediction
Predicting growth–no growth of *S. aureus* on vacuum-packaged RTE meats, 539
Growth prediction
Mathematical estimation of pathogen lag phase and growth rate, 1190
Predicting pathogen growth in raw sausage, 75
Growth rate
Growth of group I *C. botulinum* at low and high temperatures, 375
Mathematical estimation of pathogen lag phase and growth rate, 1190
Guedj
Bacterial growth control during fish fermentation in Senegal, 1930
Gum-forming bacteria
Sugar microbiology, 1332
Gutting
Effect of gutting on quality of European hake, 1671

Hake
Effect of gutting on quality of European hake, 1671
Hazard analysis and critical control point (HACCP)
E. coli O157:H7 inactivation in lemon and lime juices, 235
Food safety management systems in the Turkish poultry industry, 2221
Predicting growth–no growth of *S. aureus* on vacuum-packaged RTE meats, 539
Predicting pathogen growth in raw sausage, 75
Risk management for steam meals, 2638
Health education
Food safety knowledge retention study, 431
Health risk
Prevalence of *Salmonella* in vegetables from Mexico, 1279
Heat
Antilisterial activity of lyophilized pomegranate juice, 2508
Heat exchanger
Diversity of *L. monocytogenes* heat resistance, 999
Heat resistance
Diversity of *L. monocytogenes* heat resistance, 999
Modeling of *P. expansum* resistance, 2618
Heat shock
Effect of stress on *L. monocytogenes* resistance to UV light, 1634
Survival of heat-shocked *E. coli* O157:H7 in ground beef, 1727
Heat-stable protein
Antibody specific to fish allergen, 818
Heat stress
E. coli O157 response to heat and drought stress in lettuce, 2471
Heat treatment
Inactivation of *L. plantarum* phages, 1012
Hemolytic uremic syndrome
E. coli O157:H7 on salad leaves causes human infection, 1531
Hepatitis A virus
Hepatitis A virus in spinach, 2390
HPP inactivation of hepatitis A virus, 1434
Hides
E. coli O157:H7 and *Salmonella* on beef cattle hides, 1267
High hydrostatic pressure
HHP and vaccine development, 1500
High-pressure inactivation of *E. coli* O157:H7 in tomato juice, 2407
High-performance liquid chromatography (HPLC)
Aflatoxin M_1 in human breast and raw milk in Turkey, 885
Aflatoxin M_1 in pasteurized milk, 1761
Identification of an interfering substrate in apple juice, 805
High pressure homogenization
High pressure homogenization, 2561
Nonthermal inactivation of human enteric viruses, 2418
High pressure processing
HPP inactivation of hepatitis A virus, 1434
Inactivation of *Y. pseudotuberculosis* and *F. tularensis* by HPP, 165
Influence of pressurization rate on spore lethality, 775
High-risk food
High-risk food consumption and food safety practices, 2575
High-temperature, short-time (HTST) pasteurization
Diversity of *L. monocytogenes* heat resistance, 999
Histamine
Detection of histamine-producing bacteria in fish, 1987
Histamine in fish from markets, 1112
Histidine decarboxylase
Detection of histamine-producing bacteria in fish, 1987
Hog carcasses
Risk factors associated with *Salmonella* on hog carcasses, 2326
Hollow-fiber ultrafiltration
HUF for recovering multiple pathogens in foods, 2547
Hops beta acids
Control of *L. monocytogenes* on frankfurters with hops beta acids, 702
Household compounds
Inactivation of foodborne pathogens with household compounds, 1201
H7 latex agglutination test
fliC$_{h7}$ PCR and H7 latex agglutination test, 2195
Human enteric viruses
HPP inactivation of hepatitis A virus, 1434
Human listeriosis
Epidemiology of human listeriosis in Italy, 876
Hydrocarbon
Q. infectoria alters Shiga toxigenic *E. coli* cell surface properties, 1699
Hydrogen peroxide
Synergistic antifungal activity against *P. digitatum*, 1660
Hydrogen peroxide vapor (HPV) decontamination
HPV for the environmental control of bacteriophage, 412
Hydrophobic grid membrane (HGM) filters
HGM and ATR-IR microscopy for *Bacillus* differentiation, 1909
Hydrophobicity
Q. infectoria alters Shiga toxigenic *E. coli* cell surface properties, 1699
Hydroponic
E. coli O157:H7 in spinach cultivated in soil and hydroponic medium, 1513
Hydroxytyrosol
Olive glutaraldehyde-like compounds, 2611
Hypobromous acid
DBDMH-reduced pathogens on fresh meat, 151

Iceberg lettuce
Decontamination of shredded iceberg lettuce, 1047
TiO_2 photocatalytic disinfection of iceburg lettuce, 1916
Immunoaffinity column
Aflatoxin M_1 in pasteurized milk, 1761
Ochratoxin A in pasta, 890

Immunoassay
Antibody specific to fish allergen, 818
Immunogenicity
HHP and vaccine development, 1500
Immunomagnetic separation
Detection and isolation of *Salmonella* from food, 583
Impregnated fabric disk bioassay
Stored food mites and geraniol congeners, 1468
Inactivation
Combination treatment for seed decontamination, 631
E. coli O157:H7 inactivation in lemon and lime juices, 235
Effectiveness of bacteriophages on *E. coli* O147:H7 on fresh-cut produce, 1481
Error splitting for microbial inactivation, 843
Inactivation of foodborne pathogens with household compounds, 1201
Modeling thermal inactivation of *E. coli* K-12, 399
Trichinella survival in frozen pork, 2565
Inactivation kinetics
Inactivation of pathogens in cheese, 2243
Thermal inactivation of Salmonella on almonds, 1602
Indicator
FRNA bacteriophage as an indicator of norovirus in shellfish, 2358
Indicator bacteria
Pork carcass *Salmonella* prevalence in very small abattoirs, 714
Predicting *Salmonella* contamination of beef carcasses, 260
Indigenous pathogenic bacteria
Bacteriological quality of shellfish, 1443
Infant food
Nitrate content in canned vegetable–based infant foods, 1764
Infant formula
Carnitine—friend or foe?, 1293
C. sakazakii in neonatal mice, 2363
E. sakazakii in infant formula and milk kitchens, 37
Prevalence of AFM_1 in milk, 1025
Infant formula protection
Sodium caseinate fermentate inactivates *E. sakazakii*, 340
Inhibition
Inactivation of pathogens in cheese, 2243
Injury
Persistence of *E. coli* on injured lettuce, 458
Strategies for rapid detection of *E. coli* O157, 1862
Inoculation
Preinoculation culture conditions, 1553
Inoculum level
E. coli O157:H7 contamination of spinach leaves, 2313
Inspection
Certified kitchen managers and inspection outcomes, 384
Integrated enterprise
Food safety management systems in the Turkish poultry industry, 2221
Integron(s)
Antibiotic resistance of STEC, 21
Resistance in food *E. coli* in Tunis, 1082
Interlaboratory validation
Interlaboratory validation of a qPCR method for detecting *Salmonella*, 945
Internalization
Surface disinfection treatments for lettuce, 228
E. coli O157:H7 contamination of spinach leaves, 2313
E. coli O157:H7 in spinach cultivated in soil and hydroponic medium, 1513
E. coli O157 response to heat and drought stress in lettuce, 2471
Internalization of *Salmonella* into tomatoes through irrigation water, 849
Lack of internalization of *E. coli* O157:H7 in lettuce, 2028
Internal positive control
Real-time PCR for detection of MBM in animal feeds, 1055
Internet
Microbial quality of ground beef, 1722
Intervention measure
Group II bacteriophage to reduce *Campylobacter*, 733
Interventions
Validation of interventions in tenderized and injected beef, 1616
Intestinal flukes
Fishborne zoonotic trematodes in raw fish dishes in Vietnam, 2394
Intimin
Genotype and phenotype of sorbitol-negative *E. coli*, 28
Invasion
Mannoproteins affect *C. jejuni* adherence and invasion of Caco-2 cells, 55
Iowa
Certified kitchen managers and inspection outcomes, 384
Irradiation
Effect of pectin-nisin films and radiation on *Listeria*, 644
Irrigation
Persistence of *E. coli* on injured lettuce, 458
Transfer of *E. coli* O157:H7 to lettuce plants, 2308
Irrigation water
Cryptosporidium and *Giardia* and fresh produce, 2184
ISO 22000
Food safety management systems in the Turkish poultry industry, 2221
Isoelectric solubilization and precipitation
E. coli after isoelectric solubilization and precipitation, 1398
Isolation
Detection and isolation of *Salmonella* from food, 583
Isothiocyanate
Pathogen inactivation on lettuce and spinach by volatile antimicrobials, 2046

Japan
Impact of changes to BSE surveillance in Japan, 1463
Jerky
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
Juice
Patulin production influenced by apple variety and storage temperature, 1030
Ricin deadenylase activity in juice, 903
Juniperus chinensis
Acaricidal activity of *J. chinensis* leaf oil, 1686

^{40}K
Radiometric analysis of farmed fish, 1941
Kernels
Microbiological quality of edible nut kernels, 853
Kippered beef
Fate of pathogens on kippered beef, 403
Kitchen
Transfer of *Campylobacter* to domestic cutting surfaces, 1836
Knowledge retention
Food safety knowledge retention study, 431
Kosher
Model for survival and growth of *Salmonella* on chicken skin, 304

Lactate-diacetate
Risk assessment for *L. monocytogenes* in selected deli meats, 978
Lactic acid
Reduction of *E. coli* O157:H7 and *Salmonella* by lactic and citric acids, 2208
Validation of interventions in tenderized and injected beef, 1616
Lactic acid bacteria (LAB)
Antibiotic resistance of *L. brevis* KB290, 1923
Autochthonous strains of lactic acid bacteria, 189
Biopreservation of seafood products, 365
Biopreservation potential of an *E. faecalis* N1-33 bacteriocin, 524
Field validation of predictive models, 101
Inactivation of pathogens in cheese, 2243
Microbial quality of soft drinks, 2607
Spoilage and safety characteristics of beef, 2278
Temperature and pH effects on microflora in blown packs, 2380
Using lactic acid bacteria to validate jerky-making process lethality, 1234
Validation of interventions in tenderized and injected beef, 1616

Lactobacillus
Antibiotic resistance of lactobacilli from cheese, 2162
Multiplex PCR detection of LAB in commercial dairy products, 93
Lactobacillus brevis
Antibiotic resistance of *L. brevis* KB290, 1923
Lactobacillus plantarum
Inactivation of *L. plantarum* phages, 1012
RFEF inactivation of *L. plantarum* in apple cider, 656
Lactobacillus sakei
Evaluating *L. sakei* inhibition of pathogen growth, 251
Lactococcal phage types c2, 936
HPV for the environmental control of bacteriophage, 412
Lactococcin G
Behavior of *L. monocytogenes* in Greek Graviera cheese, 531
Lactococcus garvieae
A genetic marker for distinguishing *L. gravieae* biotypes, 1248
Lactococcus lactis
Impact of thermization treatments on raw milk flora, 783
Preparation of nisin from *L. lactis* W8–fermented milk, 2615
Lactococcus lactis subsp. *lactis*
Bacterial growth control during fish fermentation in Senegal, 1930
Lactoferrin
Bactericidal activity of lactoferrin and its derivatives in ground beef, 760
Lactose and galactose genes
A genetic marker for distinguishing *L. gravieae* biotypes, 1248
Lactuca sativa
Effectiveness of bacteriophages on *E. coli* O147:H7 on fresh-cut produce, 1481
Lagocephalus lunaris
Public health response to puffer fish (tetrodotoxin) poisoning, 810
Lag phase
Mathematical estimation of pathogen lag phase and growth rate, 1190
Risk assessment for *L. monocytogenes* in selected deli meats, 978
Lag time
Growth of *Cronobacter* spp. during cooling, 2489
Lateral flow
Campylobacter rapid test, 2483
Lateral flow immunoassay
Fumonisins in maize and agricultural practices, 898
Lauric arginate
Lauric arginate against *L. monocytogenes* on frankfurters, 1216
Lauric arginate against *L. monocytogenes* on hams, 2517
Leaf
Lack of internalization of *E. coli* O157:H7 in lettuce, 2028
Leafy greens
Association of *E. coli* O157:H7 with flies from leafy greens, 1547
Comparison of pathogen test kits for leafy greens, 2461
Leakage of intracellular bacterial substances
High-pressure inactivation of *E. coli* O157:H7 in tomato juice, 2407
Lectin
A maize protein with antifungal activity, 120
Lemon juice
E. coli O157:H7 inactivation in lemon and lime juices, 235
Lettuce
Comparison of pathogen test kits for leafy greens, 2461
E. coli O157:H7 control in lettuce processing water, 1392
E. coli O157:H7 on field-cored lettuce, 465
E. coli O157 response to heat and drought stress in lettuce, 2471
Effectiveness of bacteriophages on *E. coli* O147:H7 on fresh-cut produce, 1481
Fate of *E. coli* O157:H7 on fresh lettuce and spinach, 1560
Lack of internalization of *E. coli* O157:H7 in lettuce, 2028
Microbial antagonists of *E. coli* O157:H7 on lettuce and spinach, 1569
Pathogen inactivation on lettuce and spinach by volatile antimicrobials, 2046
Persistence of *E. coli* on injured lettuce, 458
Preinoculation culture conditions, 1553
Surface disinfection treatments for lettuce, 228
Transfer of *E. coli* O157:H7 to lettuce plants, 2308
Levulinic acid
Antimicrobial treatment for produce and poultry, 928
Lime juice
E. coli O157:H7 inactivation in lemon and lime juices, 235
Lineages
E. coli O157:H7 lineages from cattle and clinical human isolates, 601
Lineage-specific polymorphism assay
E. coli O157:H7 lineages from cattle and clinical human isolates, 601
Lipid peroxidation
E. americana extract as an additive in homemade salad dressing, 650
Liquid chromatography
Ochratoxin A in pasta, 890
Liquid chromatography–tandem mass spectrometry
Determination of luteoskyrin in rice by using LC-MS-MS, 1321
Prevalence of AFM_1 in milk, 1025
Tetramine poisoning and toxin concentrations in whelk, 1935
Liquid chromatography with tandem electrospray mass spectrometry
Fumonisin surveillance in Japanese rice and wheat, 1327
Liquid egg
L. monocytogenes in egg, 178
Liquid egg products
Salmonella Typhimurium DT104 in liquid egg products, 1992
Liquid infant formula
BPA from can coating, 2571
Listeria
Adaptive responses of *L. monocytogenes*, 1412
Assay of AS-48 in desserts, 1654
Attachment of *Listeria* and *Salmonella* to shrimp, 1181
Carnitine—friend or foe?, 1293
Detection of *Listeria* spp. in artisan cheese processing facilities, 2499
Environmental sampling and detection methods for *Listeria* spp., 696
Listeria strains isolated from three RTE meat plants, 2125
Microbial quality of ground beef, 1722
Modeling detection time of *L. monocytogenes* in frankfurters, 1878
Listeria detection
Listeria detection, 674
Listeria innocua
Behavior of *Listeria* in Greek Graviera cheese, 2264
Reduction of *Listeria* on RTE sausages by pulsed light and nisin, 347
Listeria monocytogenes
Adherence of *Listeria monocytogenes*, 1885
Antilisterial activity of lyophilized pomegranate juice, 2508
Antilisterial whey protein films, 1891
Behavior of *Listeria* in Greek Graviera cheese, 2264
Behavior of *L. monocytogenes* in Greek Graviera cheese, 531
Biofilm formation of *L. monocytogenes*, 1476
Comparison between the VIDAS method and PCR in dry sausage, 1977
Control of *L. monocytogenes* on frankfurters with hops beta acids, 702
Decontamination of shredded iceberg lettuce, 1047
Diversity of *L. monocytogenes* heat resistance, 999
Dose of UV light required to inactivate *L. monocytogenes*, 2144
Effect of pectin-nisin films and radiation on *Listeria*, 644
Effect of stress on *L. monocytogenes* resistance to UV light, 1634
Epidemiology of human listeriosis in Italy, 876
Fate of listeriae on pork scrapple, 2530
Fate of pathogens on kippered beef, 403
Impact of thermization treatments on raw milk flora, 783
Inactivation of foodborne pathogens with household compounds, 1201
Lauric arginate against *L. monocytogenes* on frankfurters, 1216
Lauric arginate against *L. monocytogenes* on hams, 2517
Listeria detection, 674
L. monocytogenes in egg, 178
L. monocytogenes in retail establishments, 2337
L. monocytogenes in RTE meat products in Latvia, 1283
L. monocytogenes in some ready-to-eat foods, 1869
L. monocytogenes in the Irish farm environment, 1450
Sanitizers against *L. monocytogenes* biofilms on cutting boards, 990
Surface disinfection treatments for lettuce, 228
Survival of *L. monocytogenes* in souse, 637
Ultrasonic cleaning of a pilot-scale conveyor, 408

Ultrasound and ozone treatment of *L. monocytogenes* biofilm, 1306
Use of chlorine dioxide in chilling brine, 2272
Listeriosis due to chicken salad consumption, 2602
Listeria spp.
Risk analysis of *Listeria* in RTE chicken meat products, 67
Listeriosis
L. monocytogenes in some ready-to-eat foods, 1869
Risk assessment for *L. monocytogenes* in selected deli meats, 978
Livestock
Association of *E. coli* O157:H7 with flies from leafy greens, 1547
Lobesia botrana
L. botrana field control and ochratoxin A in grapes, 894
Logistic regression
Bias of *Salmonella* cultivation, 707
Log-linear
Modeling thermal inactivation of *E. coli* K-12, 399
Longitudinal
Campylobacter and *E. coli* O157 in cattle, 490
Loop-mediated isothermal amplification (LAMP)
Rapid and specific detection of *tdh* in *V. parahaemolyticus* by LAMP, 748
Louisiana
Prevalence and antimicrobial resistance of *Salmonella*, 1165
Luteoskyrin
Determination of luteoskyrin in rice by using LC-MS-MS, 1321
Lymph node
M. paratuberculosis with beef cattle at processing, 1457

Macrophages
F. tularensis detection in foods, 1156
Magnetic bead
Detection assay for staphylococcal enterotoxins, 2538
Magnetic separation
Strategies for rapid detection of *E. coli* O157, 1862
Maize
Biocontrol of aflatoxin in corn, 801
A maize protein with antifungal activity, 120
A new maize trypsin inhibitor, 185
Malolactic fermentation
Production of biogenic amines by *O. oeni*, 907
Management factors
Salmonella in broiler chickens, 2202
Mannoprotein
Mannoproteins affect *C. jejuni* adherence and invasion of Caco-2 cells, 55
Manure
Transfer of *E. coli* O157:H7 to lettuce plants, 2308
Marination
Marinade and ultrasound effects on bacteria, 549
Marine mammal
Infectivity of *T. gondii* in country foods, 1756
Marine toxin
Tetramine poisoning and toxin concentrations in whelk, 1935
Marker organism
Gentamicin-resistant *Campylobacter* strain in poultry research, 1288
Market
Microbial quality of ground beef, 1722
Marketed fish
PCB, OCP, and PAH in seafood marketed in Campania, 1677
Mass spectrometry
Purification of pentocin 31-1, 2524
Mathematical modeling
E. coli O157:H7 regrowth in dairy compost, 1576
Maturity
E. coli O157:H7 contamination of spinach leaves, 2313
Maturity index
Fecal indicators in market-ready composts, 332
Maximum growth temperature
Growth of group I *C. botulinum* at low and high temperatures, 375
Meat
Arcobacter in meat and shellfish, 1102
Bactericidal activity of lactoferrin and its derivatives in ground beef, 760
Microbial quality of ground beef, 1722
Meat and bone meal
Real-time PCR for detection of MBM in animal feeds, 1055
Meat juice
Serology monitoring and cecal *Salmonella* carriage of slaughter pigs, 286
Meat mixtures
Verifying the origin of meat mixtures, 1948
Meat plant
Resistance genes in *E. coli*, 1089
Meat processing
E. coli biotype I as a surrogate for *E. coli* O157, 728
Meat production chain
Quantitative risk assessment for *Salmonella* in minced pork meat, 2252
Meat safety
CNS tissue contamination detection, 1063
Mechanically tenderized and injected beef
Validation of interventions in tenderized and injected beef, 1616
Melanoidins
Antilisterial activity of lyophilized pomegranate juice, 2508
Membrane integrity
Antibacterial action of chitosan on *Campylobacter* spp., 1735
Meta-analysis
Quantitative risk assessment of prevalence of *Salmonella* on pork, 274
Metals
Intake of essential minerals and metals, 1116
Methicillin-resistant *Staphylococcus aureus*
Assessment of *E. americana* and its bioactive compounds, 354
Methodology
Evaluation of *Campylobacter* recovery methodology, 972
Methods
Environmental sampling and detection methods for *Listeria* spp., 696
Mexico
Antimicrobial resistance in *Salmonella* isolates from Mexican foods, 966
Cryptosporidium and *Giardia* and fresh produce, 2184
Prevalence of *Salmonella* in vegetables from Mexico, 1279
Microbial
Acidified compounds on cantaloupes, 2453
Microbial contamination
Antimicrobial efficacy of fresh produce disinfectants, 1486
Microbial counts
Blood cell concentrate and rind in a salami-type sausage, 826
Microbial ecology
Crop treatment effects on phyllosphere microbial flora, 2321
Microbial indicators
Sugar microbiology, 1332
Microbial modeling
Thermal inactivation of *Salmonella* on almonds, 1602
Microbial quality
Microbial quality of school food, 197
Microbiological contamination
Effects of carcass decontamination, 1790
Microbiological quality
Microbiological quality of spices, 421
Microbiological testing
Sample preparation, 1774
Microflora
Characterization of 7-day-old chicken cecal microflora, 1812
Characterization on day-of-hatch chicken cecal microflora, 959
Microsatellites
Verifying the origin of meat mixtures, 1948
Microwave treatments
C. gloeosporioides growth–no-growth interface, 1427
Migration
BPA from can coating, 2571
Milk
Antibiotics in milk, 1338
Antimicrobial residues in Brazilian pasteurized milk, 911

B. cereus in milk, 1301
Concentration of spores by CFC, 666
Prevalence of AFM_1 in milk, 1025
Milk kitchens
E. sakazakii in infant formula and milk kitchens, 37
Minimum growth temperature
Growth of group I *C. botulinum* at low and high temperatures, 375
Mini VIDAS
Mini VIDAS for the detection of *Campylobacter* spp. on broiler meat, 2428
Mislabeling
Public health response to puffer fish (tetrodotoxin) poisoning, 810
Mismatch amplification mutation assay PCR
Ciprofloxacin-resistant *Salmonella* in Taiwan, 14
Mixed peracid
E. coli O157:H7 control in lettuce processing water, 1392
Model
Modeling detection time of *L. monocytogenes* in frankfurters, 1878
Modeling
Error splitting for microbial inactivation, 843
Microbial inactivation considering memory effects, 837
Quantitative risk assessment of prevalence of *Salmoneila* on pork, 274
Thermal inactivation of *Salmonella* on almonds, 1602
Verifying the origin of meat mixtures, 1948
Mode of action
Growth inhibition mode of action on selected benzoic acid derivatives, 791
Modified atmosphere packaging
Listeria growth and growth boundary model, 2132
Molds
Microbiological quality of seed sprouts, 856
Molecular analysis
Molecular analysis of milk spoilage bacteria by PCR and DGGE, 572
Molecular typing
Epidemiology of human listeriosis in Italy, 876
Monensin
Plant extracts and microbiological carcass contamination, 147
Monilinia fructicola
Food additives to control postharvest stone fruit decay, 1037
Monoclonal activity
Monoclonal antibody to *C. jejuni*, 870
Monoclonal antibody
Antibody specific to fish allergen, 818
Monte Carlo simulation
Neural network model for survival and growth of *Salmonella*, 2078
Quantitative risk assessment for *Salmonella* in minced pork meat, 2252
MS2 bacteriophage
Nonthermal inactivation of human enteric viruses, 2418
Multiple pathogen detection
HUF for recovering multiple pathogens in foods, 2547
Multiple stresses
Adaptive responses of *L. monocytogenes*, 1412
Multiplex PCR (m-PCR)
Arcobacter in meat and shellfish, 1102
Multiplex PCR detection of LAB in commercial dairy products, 93
Sensitive pathogen identification using PCR-based CE-SSCP, 1262
Mung bean sprouts
Concentration and detection of *Salmonella*, 591
Murine norovirus
Decontamination of shredded iceberg lettuce, 1047
Nonthermal inactivation of human enteric viruses, 2418
Murine norovirus 1
Chitosan effects on human enteric viral surrogates, 2623
Mussel processing soils
Adherence of *Listeria monocytogenes*, 1885
Mycobacterium avium subsp. *paratuberculosis*
M. paratuberculosis with beef cattle at processing, 1457
Mycobacterium mucogenicum
M. mucogenicum in street-vended chili sauces, 182
Mycotoxin(s)
Biological strategies to counteract the effects of mycotoxins, 2006
Determination of luteoskyrin in rice by using LC-MS-MS, 1321
Fumonisions in maize and agricultural practices, 898
Monitoring fumonisin in agricultural products, 436
Ochratoxin A in pasta, 890

Nectarine
Food additives to control postharvest stone fruit decay, 1037
Neonatal infection
C. sakazakii in neonatal mice, 2363
Neptunea sp.
Tetramine poisoning and toxin concentrations in whelk, 1935
Nerol
Stored food mites and geraniol congeners, 1468
Neurofilament light (NF-L)
CNS tissue detection, 1070
Neutral electrolyzed water
Sanitization of tableware used in restaurants, 1315
Neutralization reagents
Egg yolk botulinum toxin antibody, 1005
Next-generation methods
Sample preparation, 1774
Nisin
Antilisterial whey protein films, 1891
Impact of thermization treatments on raw milk flora, 783
Morphology, release characteristics, and antimicrobial effect, 2293
Preparation of nisin from *L. lactis* W8–fermented milk, 2615
Reduction of *Listeria* on RTE sausages by pulsed light and nisin, 347
Reduction of *S. aureus* in Turkish-type fermented sausage using nisn, 1739
Nisin-producing starter
Bacterial growth control during fish fermentation in Senegal, 1930
Nitrate
Nitrate content in canned vegetable–based infant foods, 1764
Nonintact beef
Fate of *E. coli* O157:H7 in cooked nonintact beef, 1404
Validation of interventions in tenderized and injected beef, 1616
Nontoxigenic
Biocontrol of aflatoxin in corn, 801
Nontuberculosis mycobacteria
M. mucogenicum in street-vended chili sauces, 182
Norovirus
Detection of a norovirus surrogate in food, 2178
Foodborne outbreak due to norovirus, Austria, 2007, 193
FRNA bacteriophage as an indicator of norovirus in shellfish, 2358
Norovirus in environmental swabs, 111
Norovirus on food handlers' hands, 1753
Novel enrichment broth
Cronobacter detection methods, 1472
Nutrition
Carnitine—friend or foe?, 1293
Nuts
Thermal inactivation of *Salmonella* on almonds, 1602

Ochratoxin A
Fungal flora and mycotoxins of Romanian cereals, 662
L. botrana field control and ochratoxin A in grapes, 894
Ochratoxin A in pasta, 890
Oenococcus oeni
Production of biogenic amines by *O. oeni*, 907
Oleuropein
Olive glutaraldehyde-like compounds, 2611
Olive
Olive glutaraldehyde-like compounds, 2611
Oncorhynchus mykiss
Effect of gamma radiation on quality of rainbow trout, 1419
On-farm
Antimicrobial exposure and resistance in *Campylobacter* from pigs, 482

Organic
Crop treatment effects on phyllosphere microbial flora, 2321
Food safety of products from organic livestock systems, 2629
Organic acids
Antilisterial whey protein films, 1891
Organic livestock
Food safety of products from organic livestock systems, 2629
Organochorine pesticides
PCB, OCP, and PAH in seafood marketed in Campania, 1677
Osmotic
Adaptive responses of *L. monocytogenes*, 1412
Outbreak
Food attribution using outbreak data from Canada, 1963
Foodborne outbreak due to norovirus, Austria, 2007, 193
Salmonella outbreak due to an asymptomatic food worker, 2332
Outbreak investigation
Bias of *Salmonella* cultivation, 707
Oyster(s)
FRNA bacteriophage as an indicator of norovirus in shellfish, 2358
HPP inactivation of hepatitis A virus, 1434
Reduction of *V. parahaemolyticus* in frozen oysters, 174
Ozone
Ultrasound and ozone treatment of *L. monocytogenes* biofilm, 1306

Packaging
Cannoli shelf life, 2553
Spoilage and safety characteristics of beef, 2278
Packaging paper
Transfer of *B. cereus* from packaging paper, 2236
Papaya
Salmonellosis associated with contaminated papaya, 1094
Parmigiano Reggiano
Antibiotic resistance of lactobacilli from cheese, 2162
Parsley
Transfer of *Salmonella* from water to parsley, 618
Partially purified fractions
Assessment of *E. americana* and its bioactive compounds, 354
Parvalbumin
Antibody specific to fish allergen, 818
Pasta
Ochratoxin A in pasta, 890
Pasteurization
B. cereus in milk, 1301
RFEF inactivation of *L. plantarum* in apple cider, 656
Pasteurized milk
Aflatoxin M_1 in pasteurized milk, 1761
Molecular analysis of milk spoilage bacteria by PCR and DGGE, 572
Pathogen(s)
Biocontrol of human pathogens on bell pepper, 85
Fate of *E. coli* O157:H7 in cooked nonintact beef, 1404
Fate of listeriae on pork scrapple, 2530
Fate of pathogens on kippered beef, 403
Inactivation of *Y. pestis* in ground beef, 564
Microbiological survey of produce in Alberta, Canada, 415
Pathogen bacteria
Detection of attached bacteria on inert surfaces by real-time PCR, 1310
Pathogenic microorganisms
Comparison between the VIDAS method and PCR in dry sausage, 1977
Inactivation of pathogens in cheese, 2243
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Spray washing of tomatoes using ClO_2, 2448
Pathogen surrogates
Using lactic acid bacteria to validate jerky-making process lethality, 1234
Patulin
Identification of an interfering substrate in apple juice, 805
Modeling of *P. expansum* resistance, 2618
Patulin production influenced by apple variety and storage temperature, 1030
Patulin surveillance in apple cider and juice, 1255

PCR
Comparison between the VIDAS method and PCR in dry sausage, 1977
Detection assay for staphylococcal enterotoxins, 2538
Detection of *Campylobacter* in poultry, 1718
Detection of *Listeria* spp. in artisan cheese processing facilities, 2499
Molecular analysis of milk spoilage bacteria by PCR and DGGE, 572
PCR-based scheme for identifying *S. enterica* serovars in samples, 2198
PCR detection of highly processed whale meat, 1496
Rapid and specific detection of *tdh* in *V. parahaemolyticus* by LAMP, 748
Species identification of grouper, 2375
Strategies for rapid detection of *E. coli* O157, 1862
PCR detection
Comparison of pathogen test kits for leafy greens, 2461
Peach
Food additives to control postharvest stone fruit decay, 1037
Peanut butter
Salmonella in peanut butter, 1596
Pectin-nisin film
Effect of pectin-nisin films and radiation on *Listeria*, 644
Pelargonium graveolens
Stored food mites and geraniol congeners, 1468
Penicillium
P. nalgiovense toxicological assessment, 1666
Penicillium digitatum
Synergistic antifungal activity against *P. digitatum*, 1660
Penicillium expansum
Modeling of *P. expansum* resistance, 2618
Patulin production influenced by apple variety and storage temperature, 1030
Pepsin digestion
Bactericidal activity of lactoferrin and its derivatives in ground beef, 760
Peracetic acid
The ineffectiveness of produce sanitizers, 2413
Percent transfer rate
Transfer of *Campylobacter* to domestic cutting surfaces, 1836
Peroxyacetic acid
Decontamination of shredded iceberg lettuce, 1047
E. coli O157:H7 control in lettuce processing water, 1392
pH
Survival of *L. monocytogenes* in souse, 637
Phage
Group II bacteriophage to reduce *Campylobacter*, 733
Phage ligand
Specificity of phage ligand for *E. coli* O157 serogroup, 1078
Phage therapy
Group II bacteriophage to reduce *Campylobacter*, 733
Phenolic
Olive glutaraldehyde-like compounds, 2611
Photoactive dyes
Photodynamic surface sanitation, 1020
Photocatalysis
Inactivation of *L. plantarum* phages, 1012
Photocatalytic reaction
TiO_2 photocatalytic disinfection of iceburg lettuce, 1916
Photodynamic treatment
Photodynamic surface sanitation, 1020
pH sensitivity
Group II bacteriophage to reduce *Campylobacter*, 733
Phyllosphere
Crop treatment effects on phyllosphere microbial flora, 2321
Physiological
Modeling thermal inactivation of *E. coli* K-12, 399
Pigs
Egg yolk antibodies and *Salmonella* shedding in pigs, 267
Serology monitoring and cecal *Salmonella* carriage of slaughter pigs, 286
Pili
Q. infectoria alters Shiga toxigenic *E. coli* cell surface properties, 1699
Plague
Y. pestis and frankfurters, 755

Planktonic
Characterization of 7-day-old chicken cecal microflora, 1812
Plantaricin A
Behavior of *L. monocytogenes* in Greek Graviera cheese, 531
Plant colonization
E. coli O157:H7 on salad leaves causes human infection, 1531
Plant extracts
Plant extracts and microbiological carcass contamination, 147
Plants
Nonculturable response of APE on plants, 1342
Plum
Food additives to control postharvest stone fruit decay, 1037
Polychlorinated biphenyls
PCB, OCP, and PAH in seafood marketed in Campania, 1677
Polycyclic aromatic hydrocarbons
PCB, OCP, and PAH in seafood marketed in Campania, 1677
Polypropylene
Adherence of *Listeria monocytogenes*, 1885
Pomegranate
Antilisterial activity of lyophilized pomegranate juice, 2508
Pork
Quantitative risk assessment for *Salmonella* in minced pork meat, 2252
Quantitative risk assessment of prevalence of *Salmonella* on pork, 274
Trichinella survival in frozen pork, 2565
Pork carcasses
Pork carcass *Salmonella* prevalence in very small abattoirs, 714
Pork meat
γ-Radiation of fresh pork meat, 556
S. aureus risk modeling in food services, 1897
Pork slaughter
Meat and poultry *Salmonella* control performance, 6
Postharvest processing (PHP) oysters
Detection of *V. parahaemolyticus* and *V. vulnificus* in PHP oysters, 2106
Postharvest-processed (PHP) oysters
Vibrios in postharvest-processed oysters, 2110
Postlethality treatment
Lauric arginate against *L. monocytogenes* on hams, 2517
Potassium lactate
Y. pestis and frankfurters, 755
Potassium sorbate
E. coli growth response, 2301
Food additives to control postharvest stone fruit decay, 1037
Poultry
Antimicrobial treatment for produce and poultry, 928
Campylobacter in retail poultry in Northern Ireland, 1830
Genetic diversity of *Campylobacter* on broiler carcasses, 49
Gentamicin-resistant *Campylobacter* strain in poultry research, 1288
Group II bacteriophage to reduce *Campylobacter*, 733
Reduction of *E. coli* O157:H7 and *Salmonella* by lactic and citric acids, 2208
Survival of *Salmonella* in frozen chicken, 2088
Poultry meat
Group II bacteriophage to reduce *Campylobacter*, 733
Poultry processing
Salmonella on broiler carcasses, 1610
Poultry skin
Transfer of *Campylobacter* to domestic cutting surfaces, 1836
Powered infant formula
Cronobacter detection methods, 1472
Power ultrasound
Ultrasound and ozone treatment of *L. monocytogenes* biofilm, 1306
Predicting contamination
Predicting *Salmonella* contamination of beef carcasses, 260
Predicting pathogen growth
Predicting pathogen growth in raw pork, 2114
Predictive microbiology
C. gloeosporioides growth–no-growth interface, 1427
Listeria growth and growth boundary model, 2132
Microbial inactivation considering memory effects, 837
Modeling detection time of *L. monocytogenes* in frankfurters, 1878
Risk management for steam meals, 2638
Predictive model
Model for survival and growth of *Salmonella* on chicken skin, 304
Predicting DON in wheat, 2170
Predictive modeling
HPP inactivation of hepatitis A virus, 1434
Predictive models
Field validation of predictive models, 101
Predictive tool
Predicting growth–no growth of *S. aureus* on vacuum-packaged RTE meats, 539
Pregnancy
Food safety risks during pregnancy, 680
Preservation
Application of bacteriocins in sous vide products, 515
Pressure-assisted thermal processing
Influence of pressurization rate on spore lethality, 775
Pressure pulsing
Influence of pressurization rate on spore lethality, 775
Pressurization rate
Influence of pressurization rate on spore lethality, 775
Prevalence
Characterization of cereal-related *B. cereus* strains in Korea, 612
Prevalence
E. coli O157:H7 and *Salmonella* on beef cattle hides, 1267
E. coli O157 on cattle farms and risk factors, 1848
L. monocytogenes in retail establishments, 2337
Prevalence and antimicrobial resistance of *Salmonella*, 1165
Prevalence and toxigenic profiles of *B. cereus*, 578
Quantitative risk assessment of prevalence of *Salmonella* on pork, 274
Salmonella from chickens and restaurants in Senegal, 2423
S. aureus in pork and chickens, 608
Small U.S. abattoirs, 1272
VTEC O157H7in Swedish cattle, 1709
Prevention
Biological strategies to counteract the effects of mycotoxins, 2006
Primers for whales
PCR detection of highly processed whale meat, 1496
Probabilistic
S. aureus risk modeling in food services, 1897
Probiotics
Antibiotic resistance of *L. brevis* KB290, 1923
Processed animal proteins
A rapid real-time PCR method for the detection of animal material, 2368
Processing plant
Listeria strains isolated from three RTE meat plants, 2125
Processing water
E. coli O157:H7 control in lettuce processing water, 1392
Process validation
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Reduction of *V. parahaemolyticus* in frozen oysters, 174
Using lactic acid bacteria to validate jerky-making process lethality, 1234
Produce
Antimicrobial treatment for produce and poultry, 928
Microbiological survey of produce in Alberta, Canada, 415
A novel approach to enhance food safety, 1509
Reduction of *E. coli* O157:H7 with electrolyzed water, 1854
Transfer of *Salmonella* from water to parsley, 618
Program evaluation
Economic cost of foodborne illness, 128
Evaluation of food safety education, 137
Protein gene product 9.5 (PGP 9.5)
CNS tissue detection, 1070
Provisional tolerable weekly intake
Intake of essential minerals and metals, 1116
Pseudomonads
Spoilage in risk assessment, 425
Pseudomonas
Molecular analysis of milk spoilage bacteria by PCR and DGGE, 572

Pseudomonas fluorescens
Biocontrol of human pathogens on bell pepper, 85
Pseudomonas fragi
Quorum sensing in *P. fragi*, 2597
Public health
Antibiotic resistance markers in Egyptian cheese, 624
Pudding
Assay of AS-48 in desserts, 1654
Puffer fish poisoning
Public health response to puffer fish (tetrodotoxin) poisoning, 810
Pulsed-field gel electrophoresis (PFGE)
Acid resistance of *E. coli* O157:H7, 503
Characterization of cereal-related *B. cereus* strains in Korea, 612
Diversity and susceptibility of *Enterococcus*, 766
Epidemiology of human listeriosis in Italy, 876
Listeriosis due to chicken salad consumption, 2602
L. monocytogenes in RTE meat products in Latvia, 1283
Salmonella eggshell contamination, 2071
Salmonella outbreak due to an asymptomatic food worker, 2332
V. parahaemolyticus in Chinese mitten crabs (*E. sinensis*), 60
Pulsed light
Pulsed light inactivation of *E. coli* in apple juice and cider, 937
Reduction of *Listeria* on RTE sausages by pulsed light and nisin, 347
PulseNet
Listeriosis due to chicken salad consumption, 2602
Pure compounds
Assessment of *E. americana* and its bioactive compounds, 354
Purification
Purification of pentocin 31-1, 2524

Qualified presumption of safety
Antibiotic resistance of *L. brevis* KB290, 1923
Quality
Acidified compounds on cantaloupes, 2453
E. coli O157:H7 growth on baby spinach, 2038
Quantitative microbial risk assessment
Quantitative microbial risk assessment for *S. aureus* in raw milk, 1641
Risk management metrics using a quantitative risk assessment, 2151
Quantitative real-time PCR (qRT-PCR)
Detection of *S. enterica* serovars Typhimurium and Heidelberg, 2350
Quantitative risk assessment
Quantitative risk assessment for *Salmonella* in minced pork meat, 2252
Quercus infectoria
Q. infectoria alters Shiga toxigenic *E. coli* cell surface properties, 1699
Quorum sensing
Quorum sensing in *P. fragi*, 2597
Quorum sensing inhibitor
Effect of green tea polyphenol on pathogenicity of *E. coli* O157:H7, 325

Rabbit
Residue depletion of doramectin in rabbit tissues, 2189
Ractopamine
β-Agonists and *E. coli* O157:H7 in feedlot cattle, 2587
Radio frequency electric fields
RFEF inactivation of *L. plantarum* in apple cider, 656
Radionuclide
Radiometric analysis of farmed fish, 1941
Radish
Microbiological quality of seed sprouts, 856
Rainbow trout
Effect of gamma radiation on quality of rainbow trout, 1419
Rapid pathogen test kits
Comparison of pathogen test kits for leafy greens, 2461
Rapid PCR detection
Detection of *S. enterica* serovars Typhimurium and Heidelberg, 2350
Rapid test
Campylobacter rapid test, 2483
Raw chicken skin
Neural network model for survival and growth of *Salmonella*, 2078
Raw cow's milk
Aflatoxin M_1 in human breast and raw milk in Turkey, 885
Raw fish dishes
Fishborne zoonotic trematodes in raw fish dishes in Vietnam, 2394
Raw meat
Mathematical estimation of pathogen lag phase and growth rate, 1190
Raw milk
Impact of thermization treatments on raw milk flora, 783
Raw pork products
Predicting pathogen growth in raw pork, 2114
Raw produce
Cryptosporidium and *Giardia* and fresh produce, 2184
Raw sausage
Predicting pathogen growth in raw sausage, 75
Ready-to-eat (RTE)
C. perfringens risk assessment, 1376
Risk analysis of *Listeria* in RTE chicken meat products, 67
Ready-to-eat (RTE) foods
Biofilm formation of *L. monocytogenes*, 1476
Ready-to-eat (RTE) meats
Effect of pectin-nisin films and radiation on *Listeria*, 644
Fate of listeriae on pork scrapple, 2530
Fate of pathogens on kippered beef, 403
Lauric arginate against *L. monocytogenes* on frankfurters, 1216
Lauric arginate against *L. monocytogenes* on hams, 2517
Listeria strains isolated from three RTE meat plants, 2125
Modeling detection time of *L. monocytogenes* in frankfurters, 1878
Predicting growth–no growth of *S. aureus* on vacuum-packaged RTE meats, 539
Real-time PCR (RT-PCR)
Concentration of bacteria from food and blood, 1225
Detection of allergen in walnut by PCR, 2433
Detection of a norovirus surrogate in food, 2178
Detection of attached bacteria on inert surfaces by real-time PCR, 1310
Detection of *V. parahaemolyticus* and *V. vulnificus* in PHP oysters, 2106
fliC$_{h7}$ PCR and H7 latex agglutination test, 2195
Interlaboratory validation of a qPCR method for detecting *Salmonella*, 945
A rapid real-time PCR method for the detection of animal material, 2368
Real-time PCR for detection of MBM in animal feeds, 1055
Vibrios in postharvest-processed oysters, 2110
Reconstitution
Growth of *Cronobacter* spp. during cooling, 2489
Recovery
Bacterial stress and injury: a review, 1121
Red grouper
Species identification of grouper, 2375
Reduction safety
DBDMH-reduced pathogens on fresh meat, 151
Red wine
Marinade and ultrasound effects on bacteria, 549
Reference dose
Intake of essential minerals and metals, 1116
Refrigeration
Growth of *Cronobacter* spp. during cooling, 2489
Regrowth potential
E. coli O157:H7 regrowth in dairy compost, 1576
Reprocessing
Salmonella on broiler carcasses, 1610
Research needs
Sample preparation, 1774
Resistance
Antimicrobial resistance in *Salmonella* isolates from Mexican foods, 966
Resistance genes
Resistance genes in *E. coli*, 1089
Resistance to bacteriophage
Group II bacteriophage to reduce *Campylobacter*, 733
Response surface model
Growth modeling of *B. cereus* in cooked rice, 1296

Restaurant(s)
Certified kitchen managers and inspection outcomes, 384
Fishborne zoonotic trematodes in raw fish dishes in Vietnam, 2394
Salmonella outbreak due to an asymptomatic food worker, 2332
Tomato handling practices in restaurants, 1692
Resuscitation
Bacterial stress and injury: a review, 1121
Strategies for rapid detection of *E. coli* O157, 1862
Retail
Campylobacter in retail poultry in Northern Ireland, 1830
L. monocytogenes in retail establishments, 2337
Retail broiler meat
Mini VIDAS for the detection of *Campylobacter* spp. on broiler meat, 2428
Reverse transcription PCR (RT-PCR)
Concentration method of enteric viruses from foods, 2001
rfbA
Biofilm formation by *Salmonella* Typhimurium DT104, 1841
Rhizosphere
Biocontrol of *Salmonella* on tomatoes, 2284
Ribosome-inactivating proteins
Ricin deadenylase activity in juice, 903
Ribotyping
Epidemiology of human listeriosis in Italy, 876
Rice
B. cereus in rice, 2386
Fumonisin surveillance in Japanese rice and wheat, 1327
Thermal inactivation of *C. botulinum* spores in rice, 2400
Rice cake
Antibacterial effect of green tea and rosemary, 1107
Ricin
Ricin deadenylase activity in juice, 903
Risk analysis
Quantitative risk assessment for *Salmonella* in minced pork meat, 2252
Salmonella eggshell contamination, 2071
Risk assessment
Food safety risks during pregnancy, 680
Illness due to *Salmonella* in chicken meat preparation, 2093
Neural network model for survival and growth of *Salmonella*, 2078
Prevalence of AFM_1 in milk, 1025
Quantitative risk assessment of prevalence of *Salmonella* on pork, 274
Risk analysis of *Listeria* in RTE chicken meat products, 67
Risk assessment for *L. monocytogenes* in selected deli meats, 978
Risk management for steam meals, 2638
S. aureus risk modeling in food services, 1897
Spoilage in risk assessment, 425
Risk-based inspection
Meat and poultry *Salmonella* control performance, 6
Risk communication
Food safety risks during pregnancy, 680
Risk factor(s)
Antimicrobial exposure and resistance in *Campylobacter* from pigs, 482
Campylobacter and *E. coli* O157 in cattle, 490
E. coli O157 on cattle farms and risk factors, 1848
Risk factors associated with *Salmonella* on hog carcasses, 2326
Risk management metrics
Risk management metrics using a quantitative risk assessment, 2151
Risk perception
Food safety risks during pregnancy, 680
River Thames
V. parahaemolyticus in Chinese mitten crabs (*E. sinensis*), 60
Romaine lettuce
Surrogate selection for *E. coli* O157:H7, 1385
Romania
Fungal flora and mycotoxins of Romanian cereals, 662
Root
Lack of internalization of *E. coli* O157:H7 in lettuce, 2028
Rosemary
Antibacterial effect of green tea and rosemary, 1107
Rosemary extracts
Antimicrobial and antioxidant activity of rosemary extracts, 1744
Runoff
Spray washing of tomatoes using ClO_2, 2448

Safety assessment
Antibiotic resistance of *L. brevis* KB290, 1923
Saffron
Microbial characterization of saffron, 2217
Salads
Field validation of predictive models, 101
Salami-type sausage
Blood cell concentrate and rind in a salami-type sausage, 826
Salmonella
Acidified compounds on cantaloupes, 2453
Antimicrobial resistance in bacteria on retail turkey meat, 473
Antimicrobial resistance in *Salmonella* isolates from Mexican foods, 966
Antimicrobial treatment for produce and poultry, 928
Attachment of *Listeria* and *Salmonella* to shrimp, 1181
Bias of *Salmonella* cultivation, 707
Biocontrol of *Salmonella* on tomatoes, 2284
Ciprofloxacin-resistant *Salmonella* in Taiwan, 14
ClO_2 gas applications in the laboratory, 952
Comparison between the VIDAS method and PCR in dry sausage, 1977
Concentration and detection of *Salmonella*, 591
DBDMH-reduced pathogens on fresh meat, 151
E. coli O157:H7 and *Salmonella* on beef cattle hides, 1267
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
Egg yolk antibodies and *Salmonella* shedding in pigs, 267
Enumeration of pathogens in broiler carcass rinses, 1099
Evaluating *L. sakei* inhibition of pathogen growth, 251
Fecal indicators in market-ready composts, 332
γ-Radiation of fresh pork meat, 556
Illness due to *Salmonella* in chicken meat preparation, 2093
The ineffectiveness of produce sanitizers, 2413
Interlaboratory validation of a qPCR method for detecting *Salmonella*, 945
Internalization of *Salmonella* into tomatoes through irrigation water, 849
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Mathematical estimation of pathogen lag phase and growth rate, 1190
Meat and poultry *Salmonella* control performance, 6
Microbial characterization of saffron, 2217
Microbiological quality of edible nut kernels, 853
Microbiological quality of seed sprouts, 856
Neural network model for survival and growth of *Salmonella*, 2078
Optimal conditions for simultaneous enrichment of STEC and *Salmonella*, 2065
Pathogenic bacteria in sheep, 1713
Pathogen inactivation on tomato by vapor-phase antimicrobials, 315
PCR-based scheme for identifying *S. enterica* serovars in samples, 2198
Pork carcass *Salmonella* prevalence in very small abattoirs, 714
Predicting pathogen growth in raw pork, 2114
Predicting pathogen growth in raw sausage, 75
Predicting *Salmonella* contamination of beef carcasses, 260
Prevalence and antimicrobial resistance of *Salmonella*, 1165
Prevalence of *Salmonella* in vegetables from Mexico, 1279
Quantitative risk assessment for *Salmonella* in minced pork meat, 2252
Quantitative risk assessment of prevalence of *Salmonella* on pork, 274
Reduction of *E. coli* O157:H7 and *Salmonella* by lactic and citric acids, 2208
Risk factors associated with *Salmonella* on hog carcasses, 2326
Salmonella eggshell contamination, 2071
Salmonella from chickens and restaurants in Senegal, 2423
Salmonella in broiler chickens, 2202
Salmonella on broiler carcasses, 1610
Salmonella Typhimurium DT104 in liquid egg products, 1992
Serology monitoring and cecal *Salmonella* carriage of slaughter pigs, 286
Small U.S. abattoirs, 1272
Spoilage and safety characteristics of beef, 2278

Surface disinfection treatments for lettuce, 228
Survival of *Salmonella* in frozen chicken, 2088
Swine environment sampling methods for *Salmonella*, 142
Thermal inactivation of *Salmonella* on almonds, 1602
Transfer of *Salmonella* from water to parsley, 618
Using lactic acid bacteria to validate jerky-making process lethality, 1234
Salmonella Enteritidis
Caprylic acid reduces *Salmonella* Enteritidis colonization in chicks, 722
PCR-based scheme for identifying *S. enterica* serovars in samples, 2198
Salmonella outbreak due to an asymptomatic food worker, 2332
Salmonella Heidelberg
Detection of *S. enterica* serovars Typhimurium and Heidelberg, 2350
Salmonella Javiana
Biocontrol of *Salmonella* on tomatoes, 2284
Salmonella Litchfield
Salmonellosis associated with contaminated papaya, 1094
Salmonella serotypes
Salmonella in peanut butter, 1596
Salmonella surrogates
Surrogates for enteric pathogens on beef carcasses, 295
Salmonella Tennessee
Salmonella in peanut butter, 1596
Salmonella Typhimurium
Detection and isolation of *Salmonella* from food, 583
Detection of *S. enterica* serovars Typhimurium and Heidelberg, 2350
Fate of pathogens on kippered beef, 403
Inactivation of foodborne pathogens with household compounds, 1201
PCR-based scheme for identifying *S. enterica* serovars in samples, 2198
Salmonella Typhimurium DT104
Biofilm formation by *Salmonella* Typhimurium DT104, 1841
Model for survival and growth of *Salmonella* on chicken skin, 304
Validation of interventions in tenderized and injected beef, 1616
Salmonellosis
Salmonellosis associated with contaminated papaya, 1094
Salt
HPP inactivation of hepatitis A virus, 1434
Sample preparation
Sample preparation, 1774
Sampling
Detection of *Campylobacter* in poultry, 1718
Sample preparation, 1774
Sampling methods
Swine environment sampling methods for *Salmonella*, 142
Sampling strategy
Verifying the origin of meat mixtures, 1948
Sandwiches
L. monocytogenes in some ready-to-eat foods, 1869
Sanitation
ClO_2 gas applications in the laboratory, 952
Sanitizer
Sanitizers against *L. monocytogenes* biofilms on cutting boards, 990
Sanitizer treatments
Modeling of *P. expansum* resistance, 2618
SansTrans
Spinach decontamination by gaseous ozone, 1538
SanVac
Spinach decontamination by gaseous ozone, 1538
Sausages
P. nalgiovense toxicological assessment, 1666
Scenario analysis
Quantitative risk assessment for *Salmonella* in minced pork meat, 2252
School food
Microbial quality of school food, 197
Scombroid poisoning
Histamine in fish from markets, 1112
Scombrotoxin
Histamine in fish from markets, 1112
Scrapple
Fate of listeriae on pork scrapple, 2530
Seafood
Biofilm formation of *L. monocytogenes*, 1476
Intake of essential minerals and metals, 1116
Screening method for *V. parahaemolyticus*, 169
Seafood safety
Reduction of *V. parahaemolyticus* in frozen oysters, 174
Seal
Infectivity of *T. gondii* in country foods, 1756
Seeds
Microbiological quality of seed sprouts, 856
Self-decontaminating materials
Photodynamic surface sanitation, 1020
Senegal
Bacterial growth control during fish fermentation in Senegal, 1930
Salmonella from chickens and restaurants in Senegal, 2423
Sensorial characteristics
Blood cell concentrate and rind in a salami-type sausage, 826
Sensory
Effect of gutting on quality of European hake, 1671
Sensory analysis
Biopreservation of seafood products, 365
Separation
Sample preparation, 1774
Serology
Serology monitoring and cecal *Salmonella* carriage of slaughter pigs, 286
Serotype
Genotype and phenotype of sorbitol-negative *E. coli*, 28
Neural network model for survival and growth of *Salmonella*, 2078
Serotyping
L. monocytogenes in the Irish farm environment, 1450
Serovars
PCR-based scheme for identifying *S. enterica* serovars in samples, 2198
Sheep
Pathogenic bacteria in sheep, 1713
Shelf life
Cannoli shelf life, 2553
Shellfish
Arcobacter in meat and shellfish, 1102
FRNA bacteriophage as an indicator of norovirus in shellfish, 2358
Shiga toxin
Genotype and phenotype of sorbitol-negative *E. coli*, 28
Q. infectoria alters Shiga toxigenic *E. coli* cell surface properties, 1699
Shiga toxin ELISA kits
Detection of Shiga toxin, 741
Shiga toxin–producing *E. coli*
Antibiotic resistance of STEC, 21
Detection of Shiga toxin, 741
Enrichment of STEC in swine wastes, 1982
Shiga toxin–producing *Escherichia coli* O157
Optimal conditions for simultaneous enrichment of STEC and *Salmonella*, 2065
Shiga toxin–producing *Escherichia coli* O26
Optimal conditions for simultaneous enrichment of STEC and *Salmonella*, 2065
Shrimp
Attachment of *Listeria* and *Salmonella* to shrimp, 1181
Listeria growth and growth boundary model, 2132
Simulation
Serology monitoring and cecal *Salmonella* carriage of slaughter pigs, 286
Simultaneous detection
Sensitive pathogen identification using PCR-based CE-SSCP, 1262
Simultaneous preenrichment
Optimal conditions for simultaneous enrichment of STEC and *Salmonella*, 2065
16S rDNA restriction fragment length polymorphism (RFLP)
Arcobacter in meat and shellfish, 1102
16S rRNA gene
Crop treatment effects on phyllosphere microbial flora, 2321
Sensitive pathogen identification using PCR-based CE-SSCP, 1262

Skin
Detection of *Campylobacter* in poultry, 1718
Slaughter by-products
Blood cell concentrate and rind in a salami-type sausage, 826
Slaughter cattle
Impact of changes to BSE surveillance in Japan, 1463
Slaughterhouse
Risk factors associated with *Salmonella* on hog carcasses, 2326
Sliced meats
L. monocytogenes in some ready-to-eat foods, 1869
Small plants
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
Small-to-medium enterprises (SMEs)
Food safety management systems in the Turkish poultry industry, 2221
Sodium benzoate
E. coli growth response, 2301
Sodium chloride
Use of chlorine dioxide in chilling brine, 2272
Sodium diacetate
Y. pestis and frankfurters, 755
Sodium dichloroisocyanurate
The ineffectiveness of produce sanitizers, 2413
Sodium dodecyl sulfate
Antimicrobial treatment for produce and poultry, 928
Sodium hypochlorite
Decontamination of shredded iceberg lettuce, 1047
E. coli O157:H7 control in lettuce processing water, 1392
Synergistic antifungal activity against *P. digitatum*, 1660
Soft drinks
Microbial quality of soft drinks, 2607
Soft rot
Biocontrol of human pathogens on bell pepper, 85
Soil
Lack of internalization of *E. coli* O157:H7 in lettuce, 2028
Solid-phase extraction
Determination of luteoskyrin in rice by using LC-MS-MS, 1321
Sorbic acid
Listeria growth and growth boundary model, 2132
Sorbitol-negative *Escherichia coli*
Genotype and phenotype of sorbitol-negative *E. coli*, 28
Souse
Survival of *L. monocytogenes* in souse, 637
Sous vide
Application of bacteriocins in sous vide products, 515
Specialty/ethnic meats
Fate of listeriae on pork scrapple, 2530
Species identification
Species identification of grouper, 2375
Species-specific primers
Enrichment PCR for detection of *Arcobacter* spp. in chicken meat, 1491
Specificity
Specificity of phage ligand for *E. coli* O157 serogroup, 1078
Specific primer
Sensitive pathogen identification using PCR-based CE-SSCP, 1262
Specified risk material
CNS tissue detection, 1070
Spent brine
Dose of UV light required to inactivate *L. monocytogenes*, 2144
Spent irrigation water
Concentration and detection of *Salmonella*, 591
Spices
Microbial characterization of saffron, 2217
Microbiological quality of spices, 421
Spinacea oleracea L.
E. coli O157:H7 in spinach cultivated in soil and hydroponic medium, 1513
Spinach
Association of *E. coli* O157:H7 with flies from leafy greens, 1547
Colonization of spinach by *E. coli* O157:H7, 1521
E. coli O157:H7 contamination of spinach leaves, 2313
E. coli O157:H7 growth on baby spinach, 2038
E. coli O157:H7 in spinach cultivated in soil and hydroponic medium, 1513
E. coli O157:H7 on salad leaves causes human infection, 1531
Fate of *E. coli* O157:H7 on fresh lettuce and spinach, 1560
Hepatitis A virus in spinach, 2390
Microbial antagonists of *E. coli* O157:H7 on lettuce and spinach, 1569
Pathogen inactivation on lettuce and spinach by volatile antimicrobials, 2046
Spinach decontamination by gaseous ozone, 1538
Spoilage
Enterocin AS-48 assay in drinks, 881
Field validation of predictive models, 101
Spoilage in risk assessment, 425
Spoilage bacteria
Molecular analysis of milk spoilage bacteria by PCR and DGGE, 572
Spoilage microflora
Inactivation of pathogens in cheese, 2243
Temperature and pH effects on microflora in blown packs, 2380
Spore inactivation
Thermal inactivation of *C. botulinum* spores in rice, 2400
Spore lethality
Influence of pressurization rate on spore lethality, 775
Spore(s)
Application of bacteriocins in sous vide products, 515
Bacillus spore susceptibility to biocides, 360
B. cereus in rice, 2386
Concentration of spores by CFC, 666
High pressure homogenization, 2561
Transfer of *B. cereus* from packaging paper, 2236
Sport drinks
Enterocin AS-48 assay in drinks, 881
Sprouted seeds
Combination treatment for seed decontamination, 631
Sprouts
Microbiological quality of seed sprouts, 856
Stabilization
C. perfringens risk assessment, 1376
Stainless steel
Adherence of *Listeria monocytogenes*, 1885
Staphylococcal enterotoxin B (SEB)
Staphylococcal enterotoxin B in yogurt, 2212
Staphylococcal enterotoxin B (SEB) in dairy
Staphylococcal enterotoxin B in yogurt, 2212
Staphylococcus
Assay of AS-48 in desserts, 1654
E. americana extract as an additive in homemade salad dressing, 650
Staphylococcus aureus
Comparison between the VIDAS method and PCR in dry sausage, 1977
Detection assay for staphylococcal enterotoxins, 2538
Mathematical estimation of pathogen lag phase and growth rate, 1190
Predicting growth–no growth of *S. aureus* on vacuum-packaged RTE meats, 539
Predicting pathogen growth in raw pork, 2114
Predicting pathogen growth in raw sausage, 75
Quantitative microbial risk assessment for *S. aureus* in raw milk, 1641
Reduction of *S. aureus* in Turkish-type fermented sausage using nisn, 1739
S. aureus in pork and chickens, 608
S. aureus risk modeling in food services, 1897
Staphylococcus epidermidis
Sanitization of tableware used in restaurants, 1315
Starter cultures
P. nalgiovense toxicological assessment, 1666
Stationary phase
Antibacterial action of chitosan on *Campylobacter* spp., 1735
Steam
Thermal inactivation of *Salmonella* on almonds, 1602

Steam meals
Risk management for steam meals, 2638
Steam ultrasound
Reduction of *Campylobacter* by physical decontamination, 497
Stochastic model
Impact of changes to BSE surveillance in Japan, 1463
Stoma
E. coli O157:H7 on salad leaves causes human infection, 1531
Stomaching
Preparing carcass sponge samples, 428
Storage
BPA from can coating, 2571
Hepatitis A virus in spinach, 2390
Storage temperature
Patulin production influenced by apple variety and storage temperature, 1030
Strain variation
Growth of group I *C. botulinum* at low and high temperatures, 375
Street-vended chili sauces
M. mucogenicum in street-vended chili sauces, 182
Stress
Bacterial stress and injury: a review, 1121
Stress proteins
Bacterial stress and injury: a review, 1121
Sublethal injury
Bacterial stress and injury: a review, 1121
Subtyping
Epidemiology of human listeriosis in Italy, 876
L. monocytogenes in retail establishments, 2337
Sucuk
Reduction of *S. aureus* in Turkish-type fermented sausage using nisn, 1739
Sugar beet microbiology
Sugar microbiology, 1332
Sugarcane juice
Chagas' disease and foods, 441
Surface contamination
E. coli O157:H7 contamination of spinach leaves, 2313
Surface disinfection
Surface disinfection treatments for lettuce, 228
Surface sanitation
Photodynamic surface sanitation, 1020
Surrogate
Lethality of home-style dehydrator processes against pathogens in jerky, 2056
Surrogate bacteria
E. coli biotype I as a surrogate for *E. coli* O157, 728
Surveillance
Impact of changes to BSE surveillance in Japan, 1463
Surveillance system
Bias of *Salmonella* cultivation, 707
Survey
High-risk food consumption and food safety practices, 2575
Microbiological survey of produce in Alberta, Canada, 415
Survival
Hepatitis A virus in spinach, 2390
Model for survival and growth of *Salmonella* on chicken skin, 304
Neural network model for survival and growth of *Salmonella*, 2078
Sodium caseinate fermentate inactivates *E. sakazakii*, 340
Survival of *L. monocytogenes* in souse, 637
Survival of *Salmonella* in frozen chicken, 2088
Survival curve
Microbial inactivation considering memory effects, 837
Survival of pathogens
Transmission and survival of pathogens in the food environment, 202
SVR typing
Genetic diversity of *Campylobacter* on broiler carcasses, 49
Sweden
C. difficile in ground meat in Sweden, 1732
VTEC O157H7in Swedish cattle, 1709
Swine
Antimicrobial exposure and resistance in *Campylobacter* from pigs, 482
Enrichment of STEC in swine wastes, 1982
Systems approach
Fate of *E. coli* O157:H7 on fresh lettuce and spinach, 1560

Tableware
Sanitization of tableware used in restaurants, 1315
Tangential flow filtration
Concentration and detection of *Salmonella*, 591
Tea
Facilitated thermal inactivation of *E. coli* O157:H7, 860
Temperature
Campylobacter in retail poultry in Northern Ireland, 1830
E. coli O157:H7 growth on baby spinach, 2038
Survival of *L. monocytogenes* in souse, 637
Temperature abuse
Model for survival and growth of *Salmonella* on chicken skin, 304
Neural network model for survival and growth of *Salmonella*, 2078
Tetramine
Tetramine poisoning and toxin concentrations in whelk, 1935
Tetrodotoxin
Public health response to puffer fish (tetrodotoxin) poisoning, 810
Thailand
Aflatoxin M_1 in pasteurized milk, 1761
Thermal inactivation
Facilitated thermal inactivation of *E. coli* O157:H7, 860
Fate of *E. coli* O157:H7 in cooked nonintact beef, 1404
Inactivation of *Y. pestis* in ground beef, 564
Salmonella in peanut butter, 1596
Survival of heat-shocked *E. coli* O157:H7 in ground beef, 1727
Thermal inactivation of avian influenza virus in dried egg white, 1997
Thermal pasteurization
Patulin surveillance in apple cider and juice, 1255
Thermal processing
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
Thermized milk
Behavior of *Listeria* in Greek Graviera cheese, 2264
Impact of thermization treatments on raw milk flora, 783
Thermostability
Antibiotics in milk, 1338
Thermostable direct hemolysin (TDH)
Rapid and specific detection of *tdh* in *V. parahaemolyticus* by LAMP, 748
Thermotolerance
Adaptive responses of *L. monocytogenes*, 1412
Titanium dioxide
TiO_2 photocatalytic disinfection of iceburg lettuce, 1916
Tomato fruit
ClO_2 gas applications in the laboratory, 952
Tomato handling practices
Tomato handling practices in restaurants, 1692
Tomato juice
High-pressure inactivation of *E. coli* O157:H7 in tomato juice, 2407
Tomato(es)
Biocontrol of *Salmonella* on tomatoes, 2284
Internalization of *Salmonella* into tomatoes through irrigation water, 849
Pathogen inactivation on tomato by vapor-phase antimicrobials, 315
Tomato handling practices in restaurants, 1692
Total aerobic bacteria
Microbial quality of soft drinks, 2607
Microbiological quality of seed sprouts, 856
Toxicology
P. nalgiovense toxicological assessment, 1666
Toxigenic profiles
Prevalence and toxigenic profiles of *B. cereus*, 578
Toxoplasma
Food safety risks during pregnancy, 680
Toxoplasma gondii
Food safety of products from organic livestock systems, 2629

Infectivity of *T. gondii* in country foods, 1756
Traceability
Verifying the origin of meat mixtures, 1948
Training
Certified kitchen managers and inspection outcomes, 384
Trans fatty acids
γ-Radiation of fresh pork meat, 556
Transmission of pathogens
Transmission and survival of pathogens in the food environment, 202
Transport
Campylobacter pre- and posttransport, 43
Enumeration of pathogens in broiler carcass rinses, 1099
Tree nuts
Microbiological quality of edible nut kernels, 853
Trichinella
Trichinella survival in frozen pork, 2565
Trimethylamine
Effect of gutting on quality of European hake, 1671
Trout
E. coli after isoelectric solubilization and precipitation, 1398
Trypanosoma cruzi
Chagas' disease and foods, 441
Trypsin inhibitor
A new maize trypsin inhibitor, 185
tuf gene
Multiplex PCR detection of LAB in commercial dairy products, 93
Tunis
Resistance in food *E. coli* in Tunis, 1082
Turbulence
Pulsed light inactivation of *E. coli* in apple juice and cider, 937
Turkey meat
Antimicrobial resistance in bacteria on retail turkey meat, 473
Turkeys
Campylobacter pre- and posttransport, 43
Turkish poultry industry
Food safety management systems in the Turkish poultry industry, 2221
Turnip
Microbiological quality of seed sprouts, 856
Tyrophagus putrescentiae
Acaricidal activity of *J. chinensis* leaf oil, 1686
Stored food mites and geraniol congeners, 1468

^{235}U
Radiometric analysis of farmed fish, 1941
Ultrapasteurization
B. cereus in milk, 1301
Ultrasonic cleaning
Ultrasonic cleaning of a pilot-scale conveyor, 408
Ultrasound treatment
Marinade and ultrasound effects on bacteria, 549
United Kingdom
Microbial quality of school food, 197
Universal preenrichment broth
Optimal conditions for simultaneous enrichment of STEC and *Salmonella*, 2065
Uptake
E. coli O157:H7 in spinach cultivated in soil and hydroponic medium, 1513
UV
TiO_2 photocatalytic disinfection of iceburg lettuce, 1916
UVC
Y. pestis and frankfurters, 755
UV light
Dose of UV light required to inactivate *L. monocytogenes*, 2144
Effect of stress on L. monocytogenes resistance to UV light, 1634
UV light radiation
Patulin surveillance in apple cider and juice, 1255

Vaccine
HHP and vaccine development, 1500
SRP *E. coli* O157:H7 vaccine effects in cattle, 866
Vacuum cooling
Spinach decontamination by gaseous ozone, 1538
Vacuum-packaged beef
Temperature and pH effects on microflora in blown packs, 2380
Validation
E. coli O157 enrichment methods, 669
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
Field validation of predictive models, 101
Vapor-phase antimicrobials
Pathogen inactivation on tomato by vapor-phase antimicrobials, 315
Vegetable model media
Effectiveness of essential oils against *Listeria*, 1209
Vegetables
Antimicrobial efficacy of fresh produce disinfectants, 1486
Concentration method of enteric viruses from foods, 2001
Nitrate content in canned vegetable–based infant foods, 1764
Prevalence of *Salmonella* in vegetables from Mexico, 1279
Verotoxin-producing *Escherichia coli*
Enrichment of STEC in swine wastes, 1982
Viable but nonculturable
Nonculturable response of APE on plants, 1342
Vibrio parahaemolyticus
Detection of *V. parahaemolyticus* and *V. vulnificus* in PHP oysters, 2106
Rapid and specific detection of *tdh* in *V. parahaemolyticus* by LAMP, 748
Reduction of *V. parahaemolyticus* in frozen oysters, 174
Screening method for *V. parahaemolyticus*, 169
V. parahaemolyticus in Chinese mitten crabs (*E. sinensis*), 60
Vibrios in postharvest-processed oysters, 2110
Vibrio vulnificus
Detection of *V. parahaemolyticus* and *V. vulnificus* in PHP oysters, 2106
Vibrios in postharvest-processed oysters, 2110
VIDAS system
Comparison between the VIDAS method and PCR in dry sausage, 1977
Vienna sausage
Reduction of *Listeria* on RTE sausages by pulsed light and nisin, 347
Vietnam
Fishborne zoonotic trematodes in raw fish dishes in Vietnam, 2394
Viral pathogens
HUF for recovering multiple pathogens in foods, 2547
VTEC O157:H7
VTEC O157H7in Swedish cattle, 1709

Walnut
Detection of allergen in walnut by PCR, 2433
Washing
Spray washing of tomatoes using ClO_2, 2448
Water
Determination of the cyanobacterial toxin β-*N*-methylamino-L-alanine, 1769
Internalization of *Salmonella* into tomatoes through irrigation water, 849
Spray washing of tomatoes using ClO_2, 2448
Water activity
E. coli O157:H7 and *Salmonella* validation of beef jerky, 2476
Water buffalo milk
E. coli O26 VTEC in buffalo milk, 1705
Weibull model
Modeling of *P. expansum* resistance, 2618
Modeling thermal inactivation of *E. coli* K-12, 399
Pulsed light inactivation of *E. coli* in apple juice and cider, 937
Salmonella in peanut butter, 1596
Western blot
Monoclonal antibody to *C. jejuni*, 870
Wheat
Fumonisin surveillance in Japanese rice and wheat, 1327
Predicting DON in wheat, 2170
Whey protein antimicrobial films
Antilisterial whey protein films, 1891

Wine
Production of biogenic amines by *O. oeni*, 907

Yeasts
Microbiological quality of seed sprouts, 856
Yeasts and molds
Microbial quality of soft drinks, 2607
Yellow rice toxin
Determination of luteoskyrin in rice by using LC-MS-MS, 1321
Yersinia
Y. pseudotuberculosis disinfection, 392
Yersinia pestis
Inactivation of *Y. pestis* in ground beef, 564
Y. pestis and frankfurters, 755
Yersinia pseudotuberculosis 197
Inactivation of *Y. pseudotuberculosis* and *F. tularensis* by HPP, 165
Yogurt
Marinade and ultrasound effects on bacteria, 549
Staphylococcal enterotoxin B in yogurt, 2212
Young chicken slaughter
Meat and poultry *Salmonella* control performance, 6

Zearalenone
Fungal flora and mycotoxins of Romanian cereals, 662
Zilpaterol
β-Agonists and *E. coli* O157:H7 in feedlot cattle, 2587
Zoonosis
Campylobacter and *E. coli* O157 in cattle, 490
Food attribution using outbreak data from Canada, 1963
z-Value
Inactivation of *Y. pestis* in ground beef, 564
